University of Dubuque
Master in Physician Assistant Studies
Student Handbook
2016-2017

Education is a continuing and changing process. To keep pace with this process, the University of Dubuque reserves the right to make changes in policies, rules, and regulations published in this handbook without obligation or prior notice. The policies, rules, and regulations within the Student Handbook apply to all UD MPAS students.

The University of Dubuque does not discriminate on the basis of race, color, national origin, sex, handicap, disability, sexual orientation, or age. Persons having inquiries may contact the Director of Human Resources, University of Dubuque, Smith Hall, 2000 University Avenue, Dubuque, Iowa 52001-5099.

Section I: Overview

Preamble
This Master in Physician Assistant Studies Student Handbook is maintained by the University of Dubuque Master in Physician Assistant Studies (MPAS) program office and its faculty, with collaborative input from faculty, administrators, and staff. The policies and procedures herein apply to all MPAS students and should serve as a guide throughout student academic, clinical, and extracurricular life. Whenever participating in UD and/or MPAS-sponsored program events on and off campus, MPAS students must abide by the policies and guidelines in this UD Master in Physician Assistant Studies Student Handbook which can be found online at http://www.dbq.edu/media/Academics/VPAcademicAffairs/GraduatePrograms/PA/UDPA-Student-Handbook.pdf and the policies of the UD Student Handbook, which can be found online at http://www.dbq.edu/media/campuslife/vpofstudentlife/2014-15-Student-Policy-Handbook.pdf

The basic premise for these student guidelines is the understanding that individual rights are accompanied by responsibilities. By enrolling in the MPAS program, students become members of the larger UD community and, thus, acquire rights in and responsibilities to the entire University community.

All policies and procedures described in this Master in Physician Assistant Studies Student Handbook and the UD Student Handbook are subject to revision at any time and without notice. Such revisions are applicable to all MPAS students. The policies and information contained herein take effect August 2016. Students are informed of significant changes and updates via their UD e-mail accounts at the time that such revisions are made and posted online. Once notified, students are subject to any changes in policy.

Questions regarding the content of this handbook should be directed to the MPAS program office.
Message from the Program Director

In offering a Master in Physician Assistant Studies program, the University of Dubuque has been given the opportunity to directly address the shortage of mid-level health care providers in Dubuque, Iowa, and the Tri-State area. We have engaged leading experts in the field of physician assistant education to create a program that will train and prepare you to become competent physician assistants.

As health care changes are implemented nationally, the interdisciplinary model of patient care is emerging as a top choice in health care delivery. Through our institution, you will have the opportunity to train in interdisciplinary teams to provide care in Dubuque, Iowa and the Tri-State area, especially to rural patients. The MPAS program has established numerous partnerships with health care providers. These partnerships will allow you to train in a variety of public and private health care facilities, acquiring the knowledge and clinical skills needed to excel as physician assistants and members of integrated health care teams.

As you pursue your MPAS education at the University of Dubuque, I challenge you to excel in this program and to embrace our social mission to transform the health of patients in surrounding rural communities.

Warren E. Gall, MD, FACS
Program Director
Masters in Physician Assistant Studies
Message from the Vice President of Academic Affairs

For over 160 years, the University of Dubuque has provided graduate and undergraduate students with an education that meets the needs of the region and world. The proposed Physician Assistant Studies program continues this proud tradition, addressing the critical need for mid-level health care professionals of competence and compassion.

You have chosen an important and challenging course of study. The University has a strong tradition of community encouragement and support. Know that we are here to help you along the way: a faculty and staff of experienced medical professionals to help you develop the necessary habits of mind and patterns of action, a network of health care providers to mentor you in the delivery of high quality health care, and a campus community to support and encourage you in this demanding journey.

As you pursue Physician Assistant Studies at the University of Dubuque, I challenge you to take advantage of all the resources at your disposal. And then, pay it forward: use your education in service to others. Welcome and blessings to you in your studies at UD.

Mark D. Ward, Ph.D.
Vice President for Academic Affairs and Dean of the College
**MPAS Vision, Mission, Goals and Values**

**Vision**

The Vision of the program is to prepare students to become primary care PAs oriented toward service to rural and underserved populations.

**Mission**

The Mission of the University of Dubuque PA program is to train qualified Physician Assistants in order to prepare them to serve the surrounding region as health-care providers. This is in keeping with the commitment of the University of Dubuque to instill:

- Excellence in academic inquiry and professional preparation
- Stewardship of all God's human and natural resources
- Zeal for life-long learning and service

**Goals**

- Train Physician Assistants to be able to pass the PANCE examination at a nationally acceptable percentage
- Prepare our graduates to be competitive when seeking a position as a PA-C
- Maintain instructional quality by ongoing self-assessment and corrective action

The program will assess progress towards these goals on a yearly basis with internal reports covering enrollment, exam scores, student and faculty evaluations, and a graduate survey. Benchmarks for each of these reports will be established, and adjustments/modifications will be made as needed.

**Values**

Our conduct, ideals, and ethics are based on:

- Integrity
- Diversity
- Competence
- Compassion
- Scholarship

For additional information on the “Achievement of Program Goals”, see our web site http://www.dbq.edu/Academics/OfficeofAcademicAffairs/GraduatePrograms/MasterinPhysicianAssistantStudies/
History and Accreditation Statement

The planning for the MPAS program began with senior administration and University trustees in October of 2011. The development process unfolded in five overlapping phases:

- Initial Program Exploration (Primary time period: October 2011 – February 2012)
- Entering the ARC-PA Accreditation Process (Primary time period: February 2012 – May 2013)
- Identifying Key Leadership (Primary time period: January 2013 – January 2015)
- Gathering Evidence for the Feasibility Study (Primary time period: September 2013 – March 2015)
- Writing and Reviewing the Feasibility Study (Primary time period: January 2015 – March 2015)

During the final two phases, interest by prospective students and support within the regional medical community has continued to grow. Additional information is available in the MPAS Program Feasibility Study.

The proposed PA program relates directly to both the mission and to the strategic goals of the University. A market study shows that there are three PA programs within the state of Iowa, the closest being 72 miles from the University of Dubuque. In addition to many independent physician practices and small community hospitals, there are four major health care organizations in the city of Dubuque: two hospitals and two multi-specialty clinics. These four sites have verbally committed to providing clinical rotations for UD Physician Assistant students and will be considered primary sites in arranging clinical placements.

The program will be based on the physician education model and will be a 27 month, 93 credit program. The initial 15 months will focus on didactic education, including between 2000 and 2160 classroom hours in the basic and clinical sciences. The final 12 months will consist of supervised clinical rotations totaling between 2000 and 2200 hours.

Unique features of the program include the development of interdisciplinary activities with our Nursing department, a rural medicine clinical rotation above and beyond the usual family medicine and internal medicine clinical rotations, and the use of specialists in clinical practice such as oncologists and clinical pathologists to teach some of the didactic material.
Section II: Student Affairs

MPAS Program Office Information

The MPAS Program office provides services for all MPAS students from the time of application to the time of commencement and beyond. Activities of the MPAS Program office include open houses, facilitation of the admissions process, mentorship of students and academic counseling.

Hours: 8:00 a.m. to 5:00 p.m. Monday through Friday except for University holidays.

Professional Staff

Program Director: Serves as chief administrative officer of the MPAS program. Oversees development and implementation of the MPAS program vision and strategies, as well as organizational and fiscal management, and review of MPAS accreditation.

Medical Director: Serves as interim director in absence of the Program Director. Supports the program director in ensuring full and effective implementation of current practice standards in academic and clinical instruction and curriculum, fulfilling the MPAS program mission, and evaluating student performance.

Academic Director: Oversees academic curriculum development, implementation and evaluation.

Director of Clinical Education: Oversees clinical curriculum development, implementation, and evaluation.

Clinical Liaison: Oversees clinical sites including hospitals, clinics, and private physician practices. Develops affiliation agreements to ensure sufficient availability of clinical sites and preceptors.

Admission Director: Oversees the admission process and collection of official documents. Maintains MPAS student records. Corresponds and works with prospective students.

Program Coordinator: Supports students, faculty and staff of the MPAS program. Serves as the immediate contact with the accrediting body under the direction of the Program Director. Maintains Program Director’s schedule. Coordinates out-going communication. Liaison with other University departments.
Financial Counseling and Financial Aid

MPAS students may seek financial counseling and aid through the UD Financial Aid Office or through the Financial Aid website http://www.dbq.edu/admission/financialaid/. Financial aid is offered in the form of grants and loans and may come from a variety of sources.

Additionally, MPAS students are encouraged to apply for other grants and scholarships offered by sources outside the university, such as the Physician Assistant Foundation, the National Health Service Corps Program, and the Physician Assistants in Orthopedic Surgery. The State of Iowa has developed “The Rural Iowa Physician Assistant Loan Repayment Program”, providing loan repayment incentives for PAs that practice in specified locations https://www.iowacollegeaid.gov/content/rural-iowa-rn-and-pa-loan-repayment-program More information is available on funding sources through the American Academy of Physician Assistants (AAPS) at http://www.aapa.org/threecolumnlanding.aspx?id=1225. There are also grants available for veterans at http://www.dbq.edu/veterans/

Academic and Career Counseling

Upon entrance to the MPAS program, each MPAS student is assigned a faculty advisor who provides academic advising. Faculty advisors monitor student academic progress and success and provide guidance in navigating course work, clinical rotations, and career opportunities. Students are expected to meet with their assigned advisor regularly. Students experiencing academic difficulty should meet with their advisor to create a plan for tutoring and/or other academic assistance.
Section III: MPAS Program Overview

Graduate Outcomes
Upon completion of the program, graduates will be able to:

1. Recognize the major principles of anatomy, physiology, pathophysiology, pharmacology, and microbiology.
2. Apply the principles of anatomy, physiology, and pharmacology to determine etiology, pathophysiology, prevention, and treatment of critical human disorders.
3. Communicate effectively with patients, families, and health service providers; counsel patients, their families, and their caregivers regarding disease treatment and care.
4. Formulate and accurately document complete medical history and physical examination.
5. Recognize and propose initial therapy for acute life-threatening situations and management plans for chronic disease.
6. Classify the need for and ability to order and understand appropriate diagnostic tests.
7. Correctly perform basic procedural skills with attention to patient comfort.
8. Attain and manage patient information from the medical record.
9. Use evidence-based medicine to provide quality health care to individuals and populations.
10. Apply quality scientific research methods.
11. Collaborate and discuss the role of the integrated patient care model with regard to physician assistants.
12. Identify and abide by the systems-level processes that support continuous quality improvement and patient safety, and use standard precautions in the health care setting.
13. Apply professional behavior attitudes for the care of patients, self, and others in accordance with American Academy of Physician Assistants’ Guidelines for Ethical Conduct for the Physician Assistant Profession.
14. Deliver appropriate patient-centered counseling techniques to improve rational utilization of health care resources, prevention, and patient satisfaction.
15. Interact effectively as part of interdisciplinary teams to address health care needs of patients.

Physician Assistant Competencies
The MPAS program has adopted and integrated into its curriculum the National Commission on Certification for Physician Assistants (NCCPA) 2012 revised guidelines defining physician assistant competencies. These competencies encompass the skills, knowledge, education, and attitudes that PAs should acquire through training and subsequent careers. The following listing and description of competencies is taken in full from the NCCPA “Competencies for the Physician Assistant Profession,” which can be found at https://www.nccpa.net/Upload/PDFs/Definition%20of%20PA%20Competencies.pdf

Medical Knowledge. Medical knowledge includes the synthesis of pathophysiology, patient presentation, differential diagnosis, patient management, surgical principles, health promotion, and disease prevention. Physician assistants must demonstrate core knowledge about
established and evolving biomedical and clinical sciences and the application of this knowledge to patient care in their area of practice. In addition, physician assistants are expected to demonstrate an investigative and analytic thinking approach to clinical situations. Physician assistants are expected to understand, evaluate, and apply the following to clinical scenarios:

- evidence-based medicine
- scientific principles related to patient care
- etiologies, risk factors, underlying pathologic process, and epidemiology medical conditions
- signs and symptoms of medical and surgical conditions
- appropriate diagnostic studies
- management of general medical and surgical conditions to include pharmacologic and other treatment modalities
- interventions for prevention of disease and health promotion/maintenance
- screening methods to detect conditions in an asymptomatic individual
- history and physical findings and diagnostic studies to formulate differential diagnoses

**Interpersonal & Communication Skills.** Interpersonal and communication skills encompass the verbal, nonverbal, written, and electronic exchange of information. Physician assistants must demonstrate interpersonal and communication skills that result in effective information exchange with patients, patients’ families, physicians, professional associates, and other individuals within the health care system. Physician assistants are expected to:

- create and sustain a therapeutic and ethically sound relationship with patients
- use effective communication skills to elicit and provide information
- adapt communication style and messages to the context of the interaction
- work effectively with physicians and other health care professionals as a member or leader of a health care team or other professional group
- demonstrate emotional resilience and stability, adaptability, flexibility, and tolerance of ambiguity and anxiety
- accurately and adequately document information regarding care for medical, legal, quality, and financial purposes

**Patient Care.** Patient care includes patient- and setting-specific assessment, evaluation, and management. Physician assistants must demonstrate care that is effective, safe, high quality, and equitable. Physician assistants are expected to:

- work effectively with physicians and other health care professionals to provide patient-centered care
- demonstrate compassionate and respectful behaviors when interacting with patients and their families
- obtain essential and accurate information about their patients
- make decisions about diagnostic and therapeutic interventions based on patient information and preferences, current scientific evidence, and informed clinical judgment
- develop and implement patient management plans
- counsel and educate patients and their families
• perform medical and surgical procedures essential to their area of practice
• provide health care services and education aimed at disease prevention and health maintenance
• use information technology to support patient care decisions and patient education

**Professionalism.** Professionalism is the expression of positive values and ideals as care is delivered. Foremost, it involves prioritizing the interests of those being served above one’s own. Physician assistants must acknowledge their professional and personal limitations. Professionalism also requires that PAs practice without impairment from substance abuse, cognitive deficiency or mental illness. Physician assistants must demonstrate a high level of responsibility, ethical practice, sensitivity to a diverse patient population, and adherence to legal and regulatory requirements. Physician assistants are expected to demonstrate:

• understanding of legal and regulatory requirements, as well as the appropriate role of the physician assistant
• professional relationships with physician supervisors and other health care providers
• respect, compassion, and integrity
• accountability to patients, society, and the profession
• commitment to excellence and on-going professional development
• commitment to ethical principles pertaining to provision or withholding of clinical care, confidentiality of patient information, informed consent, and business practices
• sensitivity and responsiveness to patients’ culture, age, gender, and abilities
• self-reflection, critical curiosity, and initiative
• healthy behaviors and life balance
• commitment to the education of students and other health care professionals

**Practice-based Learning & Improvement.** Practice-based learning and improvement includes the processes through which physician assistants engage in critical analysis of their own practice experience, the medical literature, and other information resources for the purposes of self- and practice-improvement. Physician assistants must be able to assess, evaluate, and improve their patient care practices. Physician assistants are expected to:

• analyze practice experience and perform practice-based improvement activities using a systematic methodology in concert with other members of the health care delivery team
• locate, appraise, and integrate evidence from scientific studies related to their patients’ health
• apply knowledge of study designs and statistical methods to the appraisal of clinical literature and other information on diagnostic and therapeutic effectiveness
• utilize information technology to manage information, access medical information, and support their own education
• recognize and appropriately address personal biases, gaps in medical knowledge, and physical limitations in themselves and others

**Systems-based Practice.** Systems-based practice encompasses the societal, organizational, and economic environments in which health care is delivered. Physician assistants must demonstrate
an awareness of and responsiveness to the larger system of health care to provide patient care that balances quality and cost, while maintaining the primacy of the individual patient. PAs should work to improve the health care system of which their practices are a part. Physician assistants are expected to:

- effectively interact with different types of medical practice and delivery systems
- understand the funding sources and payment systems that provide coverage for patient care and use the systems effectively
- practice cost-effective health care and resource allocation that does not compromise quality of care
- advocate for quality patient care and assist patients in dealing with system complexities
- partner with supervising physicians, health care managers, and other health care providers to assess, coordinate, and improve the delivery and effectiveness of health care and patient outcomes
- accept responsibility for promoting a safe environment for patient care and recognizing and correcting systems-based factors that negatively impact patient care
- apply medical information and clinical data systems to provide effective, efficient patient care
- recognize and appropriately address system biases that contribute to health care disparities
- apply the concepts of population health to patient care information resources for the purposes of self- and practice-improvement.

Program Curriculum
The MPAS program is a 27-month curriculum. The first 15 months are dedicated to didactic education; the final 12 months of the program are dedicated to supervised clinical rotations. Clinical rotations are between two and six weeks in length and are located at health care sites in Dubuque, Iowa, and across the Tri-State region.

The didactic phase of the program is based on a broad curriculum. Students take courses on the University of Dubuque campus. Courses include physiology, pharmacology, anatomy, clinical medicine, and clinical skills. Students should focus on their academic/didactic work during this phase and should not begin formal discussion regarding clinical rotations before the final semester of the didactic year.

The clinical phase of the program allows students to integrate their learned knowledge into health care practice. Students may not begin clinical rotations until successful completion of all didactic year course work; approval through a background check (completed through Certified Background with the cost borne by the student); documentation of immunization and titers; and successful completion of Health Insurance Portability and Accountability Act (HIPAA), Occupational Safety and Health Administration (OSHA), Advanced Cardiac Life Support (ACLS), and Pediatric Advanced Life Support (PALS) training. Students may be required to submit to additional background checks and training required by individual rotation sites. Failure to
complete the above requirements may delay the start of clinical rotations and may ultimately delay a student’s graduation. The Iowa Board of Medicine will not license anyone with a criminal record, and local hospitals will not allow students with a criminal record to participate in clinical rotations.

Core clinical rotations are in family medicine, internal medicine, geriatrics, pediatrics, psychiatry, obstetrics and gynecology, general surgery, rural medicine and emergency medicine. In addition, there are two elective rotations. Rotation sites may vary in schedule, expectations, and assignments. During the last semester of the didactic year, students receive the MPAS Student Clinical Rotation Guide, which delineates policies and procedures required of students in the clinical year.

Program Schedule
During the clinical phase of the program, the course schedule/calendar may differ from that of the general UD academic calendar. Holiday and vacation times may differ, and students may only have vacation days in between rotations.

Homeless Outreach Clinic
The MPAS program, in conjunction with local providers, has a goal to establish a community clinic to serve the local underserved and homeless population. This partnership would allow the MPAS students an opportunity to serve the community and interact with local providers who will be their mentors in the future. The clinic will extend learning opportunities for both MPAS students and faculty outside the classroom during the clinical year. It will serve to advance the mission of the University and support the local community.
Section IV: Policies and Regulations

Matriculation Policies

Immunization
The University of Dubuque and the MPAS program are committed to protecting the health and well-being of all students, faculty, staff, patients, and the public. Once students have successfully been admitted to the MPAS program, they are provided with a checklist of the mandated health requirements that include: physical examination, antibody titers, PPD or chest x-ray, immunizations, drug screening, and background checks. Students are given deadlines to submit the health requirement checklist prior to the commencement of classes in order to comply with matriculation standards. These mandated procedures/tests are required annually for continued enrollment in the program. Students who do not meet the mandated requirements are not allowed to register for classes, and a hold is placed on their registration until compliant.

All students are required to have proof of current health insurance coverage and should consider current long-term disability insurance as well.

The MPAS program developed its policy and immunization guidelines based on the guidelines issued by the Centers for Disease Control and Prevention (CDC) [http://www.cdc.gov/vaccines/adults/rec-vac/hcw.html](http://www.cdc.gov/vaccines/adults/rec-vac/hcw.html) that apply to all undergraduate, graduate, and professional students attending any public or private university in the State of Iowa, specifically those involved in health care.

Immunization requirements are summarized below:

**Measles, Mumps, and Rubella.** State of Iowa pre-matriculation immunization requirements include documentation of measles, mumps, and rubella immunity for all students prior to registration for classes. As a prerequisite to matriculation or registration, the State of Iowa requires all students born after 1956 to present documented proof of immunity to measles and rubella. Consistent with Department of Health guidelines, acceptable proof of immunity constitutes copies of measles, mumps, and/or rubella blood antibody titers verifying immunity. Students who cannot prove immunity must receive vaccinations prior to the start of the program.

**Tetanus/Diphtheria/Pertussis Immunization.** Based on the guidelines published by CDC, matriculating students who have not had a tetanus booster within the past two years should receive the tetanus, diphtheria, and pertussis (Tdap) vaccine, which protects against diphtheria, tetanus, and pertussis (whooping cough).

- A single dose of Tdap must be given for adults aged 19 through 64 years who have not received a dose of Tdap previously.
- Afterwards, adults should receive a tetanus/diphtheria (Td) booster every 10 years.
Hepatitis B Immunization Series. Students must show documented proof of vaccination and immunity to Hepatitis B, as described below:

- Students must document hepatitis B titer status
- If the titer is positive, no further action is necessary
- If the titer is negative, the following steps are required:
  - A total of three doses of hepatitis B vaccine are needed
  - Proof of receipt of at least the first dose of hepatitis B vaccine is required prior to the first day of classes.
  - The rest of the three-dose series must be completed and a positive titer documented prior to beginning clinical rotations.
  - If the hepatitis B surface antibody titer is negative, a second series of hepatitis B vaccinations must be repeated.
  - Immunizations can be received at local health clinics.
  - Students also may receive immunizations at their private physician’s office or at an ambulatory care clinic.
  - Students who continue to have negative hepatitis B surface antibody titers receive individual counseling on how best to protect themselves and prevent hepatitis B infection and special procedures to follow after a needle stick injury.

Chickenpox (varicella). Proof of positive (immune) varicella antibody titer or receipt of two doses of the varicella vaccine four to eight weeks apart is required. In the absence of proof of either immunization or immunity, students can be immunized by local clinics.

Influenza. Students are required to receive the seasonal flu vaccine annually.

Purified Protein Derivative (PPD) Screening for Tuberculosis (TB). Students are required to receive an appropriate TB skin test (TST) within two months prior to orientation; this can be part of their required physical examination.

- MPAS follows CDC guidelines, which state: “for baseline testing, a two-step procedure for persons without a PPD test in the past 12 months can be used to minimize the likelihood of confusing reactivity from an old infection (boosting) with reactivity from a recent infection (conversion).” Therefore, unless a student has proof of having a current two-step PPD test (defined as at least two intracutaneous Mantoux tests, given a minimum of one to three weeks apart within the previous 12 months) or history of a positive PPD at the time of matriculation, he or she is required to have the two-step test completed prior to the first clinical experience. If the student has had at least one PPD in the past 12 months, one test prior to matriculation is sufficient to meet the two-step test requirement.
- TB skin testing is required prior to orientation and annually thereafter.
- TB skin testing guidelines include the following:
Positive PPD reactors are required to be assessed annually by a health care provider, have a chest radiograph that reveals no acute cardiopulmonary process, and/or complete a symptom screening form annually thereafter.

A chest radiograph is mandatory for new and previous positive reactors; if positive, the student must document proof of receiving appropriate treatment.

Students who received Bacille Calmette Guerin (BCG) more than 18 months previously are required to have a TB skin test.

Decisions are made on an individual basis as to the ability of a student on active TB treatment to pursue coursework and/or clinical rotations, based on the recommendations and medical clearance. All immunization forms must carry the original signature of a physician or a licensed medical practitioner and the license number or office stamp with address.

MPAS students may be required to have additional vaccines, scheduled or random drug testing, and/or other medical tests prior to starting classes and/or clinical rotations, as required by MPAS and all affiliated clinical educational sites. Additional periodic evaluations or tests may be required as indicated, or if exposure to an infectious patient or pathogen occurs.

Monitoring for Immunization Compliance. The MPAS Admission Director works with the students to discuss specific requirements for vaccines, titers, PPDs, health insurance, health, and safety agreements and will indicate student compliance or itemize any deficiencies prior to the beginning of the semester. Students will be notified via email by the MPAS Admission Director if they do not meet the minimum immunization and health compliance requirements.

Students who fail to comply with immunization requirements are not eligible to attend clinical rotations until all requirements are met. Exceptions to this policy may be granted in the event of valid medical contraindications, for religious reasons, or if the student is in the process of receiving the complete vaccine series (e.g., hepatitis B, varicella).

Inability to Complete an Immunization. In the event that a student is unable to complete an immunization, series of immunizations, or screenings as required for any medical or nonmedical reason, the student is required to sign a formal declination acknowledging the risks and provide a physician’s note documenting the medical exemption. The signed formal declination also states that should a local outbreak occur of the infectious disease to which a student is not immune, the student is not permitted to participate in any clinical care activity until the epidemic is cleared by the Iowa Department of Health.

Health Insurance

MPAS students are required to possess current and adequate medical insurance to cover emergencies and common medical problems that might occur during their educational training period. The cost of medical insurance is borne by the student.
Alternatively, students may satisfy the medical insurance requirement with documentation of a valid medical insurance plan already in effect that meets the basic minimal standards as described below. The determination of whether alternative insurance policies meet the minimum standards is made by the MPAS Program Director.

There are basic minimum benefit requirements for health insurance. Coverage must be effective for the entire MPAS program, including annual breaks, regardless of the student’s terms of enrollment. The policy must provide continuous coverage for the entire period the insured is enrolled as a MPAS student and must be renewable. The policy must provide in-network and out-of-network coverage for physician, hospital, diagnostic, and therapeutic coverage in local facilities for both emergency and nonemergency outpatient and inpatient services in the local Dubuque, Iowa, area. The policy must not unreasonably exclude coverage for perils inherent in the student’s program of study, such as coverage for needle stick injuries and charges related to the post-exposure diagnosis and treatment of blood-borne pathogens. The policy also must cover outpatient and inpatient mental health care, prescription drugs, and ambulance services.

**Disability Insurance**

All MPAS students are encouraged to enroll in a disability insurance plan to cover injuries that might result in chronic disability during their educational training period.

**Criminal Background Checks**

Criminal background checks are required prior to enrolling in classes in the MPAS program. The initial background checks will be completed through Certified Background via CASPA (www.certifiedbackground.com), with the cost borne by the student. An additional background check through Certified Background will also be required prior to participation in clinical rotations (Certified Background will contact the student), and one is also performed by the state upon submission of application for licensure. Findings in background checks may affect a student’s admission, and the student’s ability to participate in clinical rotations and complete the program. During a student’s tenure at UD, if the student is arrested, charged, or convicted of a felony or misdemeanor, he/she must disclose such an event to the Program Director. Failure to disclose this information may result in disciplinary action, up to and including expulsion from the program.

**Drug Testing**

Drug testing is required prior to enrolling in classes in the MPAS program. The initial drug test will be completed through Certified Background via CASPA, with the cost borne by the student. An additional drug test through Certified Background (working with a testing organization in Dubuque) will also be required prior to participation in clinical rotations. Findings in drug tests may affect a student’s admission, and the student’s ability to participate in clinical rotations and complete the program.
Substance Abuse Policy for MPAS

The goal of the MPAS Substance Abuse Policy is to ensure safety throughout the program and to prepare students for physician assistant standards. Four objectives accompany this goal:

1. Contribute to the education of the MPAS student regarding substance abuse.
2. Aid the MPAS student in finding medical assistance and counseling for substance abuse related violations.
3. Facilitate compliance with physician assistant accreditation and regulations.
4. Protect the health and safety of all students.

Procedures

Consent

As part of the rules for clearance to participate in the MPAS clinical rotations, each student must sign a form stating their understanding and willingness to abide by the UD Substance Abuse Policy. Each MPAS student must sign a UD drug-testing consent form stating they are aware they may be drug tested randomly or based upon reasonable suspicion. Students who are required to be tested for substance abuse will be issued a Clinical Document of Concern (Appendix D) which will become a permanent part of their record.

The MPAS Program reserves the right to conduct random drug testing or drug test any MPAS student if a member of the MPAS faculty, staff, or clinical preceptor can show reasonable suspicion that a particular student is using, or in the case of anabolic steroids, has used any substance in violation of this policy. The MPAS Program also reserves the right to conduct drug testing after any accident or incident in a clinical rotation. A positive test result will be considered a violation of this policy and may subject the student to the consequences discussed below.

Reasonable Suspicion

Reasonable suspicion is defined as a good faith belief, at the time of making the decision to test, that the information relied upon is accurate and there is reason to suspect that an MPAS student has used illegal or performance enhancing substances.

Violations

If an MPAS student abuses over-the-counter and/or prescription drugs, or consumes anabolic steroids, alcohol, mind altering, and/or performance enhancing substances illegally, the student’s status in the MPAS program may be jeopardized. Illegal consumption includes any action that violates federal and/or state law, or University regulations. If the student receives a citation for drugs, alcohol or illegal substances and is found guilty, pleads no contest, receives a deferred judgment, or is convicted, sanctions will be imposed. (Citations include, but are not limited to open containers of alcohol, providing alcohol to minors, illegal possession of drugs, driving or operating a motor vehicle under the influence of drugs and/or alcohol.)

The following sanctions are proposed to ensure consistency and fairness. The primary principle is that any MPAS student with a substance abuse problem needs to receive appropriate treatment and counseling. The sanctions imposed on the MPAS student with regard to participation in MPAS courses
or clinical rotations should be consistent with the goals of the individualized counseling program. This protocol attempts to balance treatment and sanctions, recognizing that the medical fitness of an MPAS student and the safety of others are of paramount concern.

*First Violation*
Following a first violation, the MPAS student will confer with the Program Director to discuss the situation. The student will also attend mandatory counseling or educational sessions on campus as determined by the Program Director.

The MPAS student will not be able to continue with any clinical assignments based on discussion with the Program Director.

Failure to complete the counseling or educational sessions will be construed as a further violation of the policy and will result in dismissal from the MPAS program.

After the first violation, MPAS students will be subject to the MPAS Program random drug testing, as the standard of reasonable suspicion will have been established.

Depending on the severity of the violation, the Program Director may dismiss a student immediately.

*Second Violation*
A second violation will result in the immediate removal of the MPAS student from the program. The MPAS student may seek reinstatement by submitting a formal request detailing the reasons why he or she seeks reinstatement. This formal request may include the reason and circumstances surrounding the violations, ways in which the student is seeking to address the pattern of drug and alcohol abuse, etc. The request for reinstatement must be filed within one month of the MPAS student being suspended or dismissed from the program.

**Conclusion**
This substance abuse policy is in effect during the entire year. Violations of the policy accrue during the entire academic career of the MPAS student while attending UD.

The University of Dubuque retains the option to test for other substances at the discretion of the Program Director.

UD discourages the use of dietary supplements that are untested and unproven. Many supplements contain items that are banned, yet are not listed as ingredients. If a MPAS student knowingly or unknowingly takes a banned substance and tests positive, the student is subject to the consequences listed above. Dietary supplements may have a deleterious effect on a person’s health.

**Substance Use: Sanctions for Impaired Behavior**
Students whose behavior rises to a formal level of concern regarding substance use will immediately be removed from any patient care area, given an unexcused absence, and issued a Clinical Document of Concern (Appendix D) which will become a permanent part of their record.
Medication Rules:

Prescription Drugs. Any student may bring prescribed drugs to class or a clinical site and take during work hours only if the medication has been prescribed for the student by the physician or authorized prescriber (such as a dentist), and only if the drug is taken in accordance with the prescriber’s directions. All prescription drugs must be kept in the original container in which they were received from the pharmacy or other dispenser.

Over-the-Counter Drugs. A student may possess and take an over-the-counter drug during clinical hours only if the drug is used for its intended purpose and in accordance with the package directions, and/or any supplemental directions of the student’s physician, and the use of the drug does not render the student “otherwise unqualified” to meet program safety and learning objectives.

Required Medical Equipment, Supplies, and Books

The following is a list of the required and recommended equipment:

- Ophthalmoscope
- Otoscope with disposable otoscope speculums
- Stethoscope
- Sphygmomanometer with adult cuff (blood pressure cuff)
- Tuning forks 128 and 512 HZ
- Reflex hammer
- Hand-held Snellen chart (i.e., pocket eye chart)
- Pen light
- Ruler
- Tape measure
- Tongue depressors
- Paper clips
- Cotton balls
- Equipment bag (optional)
- Green PA scrubs
- White lab coat with UD MPAS logo and student name embroidered
- UD MPAS ID
- Laptop computer. Minimum requirements as follows:
  - Sound capability and speakers
  - Internet connection with private internet service provider (ISP) for universal access to the Internet
  - Microsoft Office
  - Flash drive
Textbooks
Students are required to purchase textbooks as specified in class syllabi. Students may access some online textbooks through the UD Library, in which case the purchase of a hard text is optional.

Academic Policies

Grades
Students must earn a score of 77% or above to pass a course. Any score below a 77% is considered failing. Students who fail to maintain a minimum GPA of 3.0 or “Pass” in a Pass/Fail course are referred to the Student Evaluation Committee (SEC), described below. Students who do not return to good standing in the subsequent semester may be dismissed from the program.

Courses are graded using the following scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>93-100%</td>
</tr>
<tr>
<td>A-</td>
<td>91-92%</td>
</tr>
<tr>
<td>B+</td>
<td>89-90%</td>
</tr>
<tr>
<td>B</td>
<td>85-88%</td>
</tr>
<tr>
<td>B-</td>
<td>83-84%</td>
</tr>
<tr>
<td>C+</td>
<td>81-82%</td>
</tr>
<tr>
<td>C</td>
<td>77-80%</td>
</tr>
<tr>
<td>C-</td>
<td>75-76%</td>
</tr>
<tr>
<td>D+</td>
<td>73-74%</td>
</tr>
<tr>
<td>D</td>
<td>69-72%</td>
</tr>
<tr>
<td>D-</td>
<td>67-68%</td>
</tr>
<tr>
<td>F</td>
<td>00-66%</td>
</tr>
</tbody>
</table>

Incomplete Grades

Didactic year. All required course assignments must be completed by the end of the semester or the student will receive an “Incomplete” (I) for the course. All course work must be successfully completed within one week of the end of a semester. Failure to complete the required course work during the time limit may result in a failing grade for the course.

Clinical Year. A grade of incomplete may be assigned for any missing evaluation, assignment, or examination. Failure to complete course requirements within the prescribed time may result in referral to the SEC.
Written Assignments
Any written assignment will lose 10% of its score within each 24 hour period later than the date and time it is due. Unless otherwise directed, all papers must conform to the following standards:

- Typed in MS Word in standard 8.5 x 11 inch pages with 1 inch margins all around.
- Typed in Times New Roman size 12 font, double-spaced, with covering title/author page.
- References following APA style http://libguides.dbq.edu/PA/citations
- No more than 20% of the document in attributed quotes. Ellipses may be used to shorten content within quotes.
- Submitted electronically via an email attachment to the course director.

Experiential Learning
The MPAS program does not give credit for prior student experience working in the field.

Transfer Credit
The MPAS program does not accept transfer credit from other Physician Assistant programs.

Attendance
MPAS students are expected to be present, prepared, and actively engaged in all classes, labs, and clinical rotations. Prompt and regular attendance is part of the professional behavior that students are expected to demonstrate. Students are responsible for scheduling personal appointments around class, labs and clinical rotation schedules.

In the event of a short term, unexpected absence, students are expected to notify the course director/preceptor by email preferable before the class/clinical rotation, but if unable to do so, after the class/clinical rotation was missed. Three unexcused absences from any course/clinical rotation are grounds for failure in that course. Students have the responsibility of notifying each course director/preceptor individually for the absence. Documentation supporting the absence is expected. For example, if the student’s car breaks down, the program expects to see a towing or repair bill as evidence.

In the event of an anticipated absence requiring the student to miss one or more days of courses or a clinical rotation, the student must complete the Absence Excusal Form (Appendix-A) and submit it to the Program Director at least seven days in advance of the anticipated absence. Examples include an elective operation or delivery, death of a first-degree relative creating responsibility with dependent care arrangements, and recovery from a car accident. In addition, students absent from a clinical rotation as a result of an emergency must complete and submit this form to the Program Director within 24 hours of their absence. Failure to do so may result in referral to SEC.
Students are responsible for contacting the Academic Director in advance of missing a scheduled examination. Students who do not contact and receive permission for the absence from the Academic Director to arrange for a make-up examination, or do not have a valid emergency excusal, will earn a grade of zero for the examination and may be referred for review to the SEC (Student Evaluation Committee). Students who miss an examination as the result of an excused absence may expect to make up the examination within a reasonable amount of time, as agreed upon by the Academic Director and the student. The make-up examination may differ from the one missed.

For clinical rotations, students are responsible for contacting the Director of Clinical Education in advance of missing any call-back days in order to arrange for end-of rotation examinations. Students who do not contact and receive permission for the absence from the Director of Clinical Education to arrange for a make-up examination, or do not have a valid emergency excusal, will earn a grade of zero for the examination and may be referred for review to the SEC (Student Evaluation Committee). Students who miss an examination as the result of an excused absence may expect to make up the examination within a reasonable amount of time, as agreed upon by the Director of Clinical Education and the student. The make-up examination may differ from the one missed.

No program activities are rescheduled to account for student absences, including course sessions, labs, evaluations, and assessments. Should excused absences occur, students are responsible for completing all material missed.

Students may be required to attend weekend and/or evening events outside of regularly scheduled courses or rotations. Students will be notified of any changes in course times, lectures, or exams.

**Leave of Absence**

Leaves of absence can be recommended by the SEC or be initiated upon student request. Students who want to request a leave of absence must discuss their intention with their advisor. With advisor approval, the student completes a petition to request the leave of absence. The petition is submitted to the Program Director, who gives a final decision. A leave of absence may be requested and granted for academic, medical, or other personal reasons. Leaves of absence are granted for a period not exceeding one year, except for military service according to length of military commitment.

**Remediation**

Remediation is a formal process designed to address and correct deficiencies in a student’s knowledge, skills, and/or professional behavior. Remediation plans are designed with use of measurable objectives to be completed within a fixed period of time. Should a remediating student fail to meet the terms of the agreed-upon remediation plan, the student will face dismissal.
Remediation may be initiated on the recommendation of a faculty member or may be required by the SEC. The SEC makes its recommendation regarding referrals for remediation based on the process described below.

Students offered the opportunity to develop a remediation plan should speak with their advisor, the Program Director, and other relevant stakeholders regarding their decision. MPAS students may use other resources such as the UD library. The faculty may be involved in remediation plans, and their recommendations may be incorporated into an educational review to enhance achievement of the stated goals.

Deceleration
Deceleration occurs when students remain active in the MPAS program, but do not progress with their entering cohort. The decision of whether a student should be offered a deceleration plan is made by the SEC; final adjudication is the responsibility of the Program Director. Students taking a deceleration plan must meet all terms defined in the plan within the specified timelines. Students who do not meet these terms or do not do so within the specified timelines are dismissed from the program.

Dismissal
The MPAS program, after due consideration and process, reserves the right to dismiss any student at any time before graduation for any reason legal, moral, behavioral, ethical, or academic. Recommendations for dismissal are made by the SEC to the Program Director pursuant to the process described below.

Withdrawal
Official withdrawal from the program requires approval from the Program Director and completion of withdrawal documentation by the student.

Failure of Exams and/or Courses
A student who fails an exam other than the final exam will receive an emailed Letter of Concern from the MPAS Academic Director. Copies of this letter are sent to the student’s faculty advisor and kept on file in program records. The student is required to meet with his or her advisor no later than one week of receipt of the letter to discuss the exam failure.

A student who fails a second exam will receive an emailed Letter of Concern from the MPAS Academic Director. The second letter of concern notes the potential for automatic referral to the SEC should the student fail a third exam. Copies of this letter are sent to the student’s faculty advisor and kept on file in program records. The student is required to meet with his or her advisor no later than one week of receipt of the letter to discuss exam failure.

A student who fails a third exam is automatically referred for review to the SEC.

If a student fails a course (didactic) or a clinical rotation or a final exam or end-of-rotation exam, he or she is referred for review to the SEC, and a self-directed study or remediation plan may be
created in order that the student may pass the course. If the student is required to repeat the course or rotation, it may impact the date of graduation. If a student fails two courses at any time during the program he or she is dismissed from the program.

Program Progression and Graduation Requirements
Student records are reviewed by faculty advisors prior to progression from the didactic to the clinical year. Students must pass all academic courses before moving into the clinical phase of the MPAS program.

The MPAS Program Director and faculty will review all student records prior to graduation. All MPAS program requirements must be met and any outstanding financial balances paid prior to awarding of a diploma. Students who do not graduate are ineligible to take the Physician Assistant National Certifying Examination (PANCE). Before graduation, students must meet all of the following:

1. Pass each required course/rotation with a grade of ‘C’ (77%) or higher.
2. Pass summative examinations (written, practical, oral, simulation, and Objective Structured Clinical Examinations or OSCEs) and presentations in the didactic and clinical phases.
3. Comply with the Program “Code of Conduct” and the UD “Value of Integrity”.
4. Complete the Program’s Physician Assistant Board Review Course.

Patient Confidentiality
MPAS students are expected to respect the rights of patients, including the rights to privacy and confidentiality, and shall maintain the privacy and security of all patient records and information in accordance with UD and MPAS policies, the policies of affiliated clinical hospitals and facilities, and state and federal law. As a member of the patient care team, MPAS students have access to health information that is protected from disclosure under state and federal law (“protected health information”) including patient medical and/or demographic information. The MPAS program and each MPAS-affiliated hospital and clinic is subject to the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and has developed HIPAA privacy and security policies to prevent unnecessary and inappropriate disclosures of health information (http://www.hhs.gov). MPAS students are required to abide by HIPAA privacy and security policies and receive education and training to understand the requirements of policies and law. Student participation in training is monitored by the MPAS program office. In general, protected health information may not be discussed or disclosed to anyone—either verbally, in writing, or electronically—unless this disclosure is necessary to perform the student’s duties and responsibilities. MPAS students may not review medical records or access electronically stored patient information unless such review is required in the performance of assigned duties. Students are responsible for maintaining the confidence of patients by sharing confidential information only with others who need to know and by handling any documentation of information in a manner that maintains its confidentiality. MPAS students are required to submit a signed confidentiality statement during their orientation process and on an annual basis.
thereafter. Students should note that the HIPAA privacy and security policies apply to all student–patient interactions in formal curricular, extracurricular, or even in volunteer contexts.

Inappropriate disclosure of protected health information is a serious matter that reflects adversely on a MPAS student’s professionalism and fitness to become a physician assistant. The following basic rules are considered fundamental requirements for UD MPAS students at all times:

- Under no circumstances should any protected health information be accessed (read or copied) in the absence of a requirement for performance of duties.
- Health information obtained while providing clinical care duties may not be discussed with others unless (a) such individuals are involved in the treatment of that patient or (b) it is necessary to fulfill educational objectives required of the student.
- Once confidential information is on paper and in a MPAS student’s hands, he or she is responsible for appropriate disposition: (a) distribute to authorized persons only, (b) file securely, or (c) destroy.
- Medical professionals do discuss cases in wider audiences, so long as the patient is de-identified and details sufficiently common or modified as to preclude patient identification by the audience.

Student Employment

The MPAS program discourages students from holding outside employment while enrolled in the didactic or clinical years. In the case that a student finds it necessary to hold outside employment while taking courses or during clinical rotations, he or she should speak to his/her assigned faculty advisor. Expectations, assignments, and due dates are not changed for students who are employed.

Student Work to Benefit the MPAS Program

MPAS students are not required to work on behalf of the MPAS program in any clerical, administrative, or instructional capacity. While students may be asked to volunteer for a particular task or activity, students are not obligated to do so. Students who choose to volunteer do not receive remuneration for the task completed.

Student Responsibilities in Clinical Rotations

During the clinical year of the program, MPAS students rotate at various clinical sites. During clinical rotations, students are not allowed to substitute for or function as clinical or administrative staff. Any student found performing administrative or clinical activities that are the responsibility of the preceptor are recommended for disciplinary action up to dismissal from the program.

Student Assessment Process

Student performance is assessed based upon academic performance and demonstrated professionalism, including behavior in the classroom and clinical settings. The evaluation criteria are described in this MPAS Student Handbook in the Physician Assistant Competencies section.
above. The Student Evaluation Committee (SEC) is the committee tasked with evaluating all aspects of each student’s performance. The SEC may evaluate a student’s performance regardless of when an event(s) triggering review occurs, and shall include the student’s overall performance in the evaluation, including prior disciplinary actions and/or remediation. A student may be referred to the SEC by an advisor, another faculty member, or the Program Director. Through the review process, the SEC is responsible for examining the concerns cited, evaluating their merits, determining student status, and recommending a course of action. Additionally, at the end of the didactic and clinical phases of the curriculum, faculty evaluate each MPAS student’s grades and professionalism and may refer students to the SEC for further evaluation before making a recommendation regarding advancement to the clinical phase or graduation, as applicable. The SEC is responsible for evaluating each student’s academic performance and professionalism; all facets of a student’s performance are considered when a student is evaluated by the SEC. Students may not have lawyers accompany them in any meetings with faculty or staff.

An appeals process is established in this MPAS Student Handbook to allow appeals from adverse recommendations when there are sufficient grounds as more specifically provided herein. This summary is not intended to fully describe the processes set forth below. In the event of a conflict between this summary and the specific provisions set forth herein, the specific provisions shall control.

**Professionalism Policies**

MPAS students are required to abide by the MPAS Code of Academic Integrity, the MPAS Student Code of Conduct, the applicable policies and procedures of the MPAS Program, and the policies and procedures of institutions with which MPAS has affiliation agreements. In addition to abiding by the policies and procedures of UD and specifically of the MPAS program, MPAS students are expected to abide by the American Academy of Physician Assistants’ Guidelines for Ethical Conduct for the Physician Assistant Profession, which can be found at: [https://www.aapa.org/workarea/downloadasset.aspx?id=815](https://www.aapa.org/workarea/downloadasset.aspx?id=815)

Violations by a MPAS student of any of the above policies or procedures are reviewed and processed by the Program Director and/or the SEC as provided in this MPAS Student Handbook.

MPAS students must demonstrate professionalism in their attitude and interpersonal skills with all members of the University community. MPAS students are representatives of the Program, the University, and the profession, and a high standard of professional ethics is required at all times. Behaviors such as cheating, malicious conduct or any evidence of unprofessional activity will be grounds for disciplinary action, including dismissal from the Program. Students are expected to be cognizant of their behavior at all times and embrace the professional responsibility that comes with being a University of Dubuque MPAS student.

**Classroom and Clinical Site Professional Behavior**

MPAS students, staff, faculty, administrators, and preceptors all are responsible for ensuring appropriate student conduct. Professional conduct is required of MPAS students within and outside the classroom and clinical rotation sites. Students should interact with peers and
patients with respect and courtesy, and should refrain from behavior that interferes with another’s ability to learn or to teach.

Students should arrive on time for class. Should tardiness be unavoidable, students should enter the classroom quietly and sit in the back of the room. Students should not leave the classroom during a lecture. Students should not use electronic devices for anything other than note taking. Students should refrain from making noise or from participating in distractions during class. Students should not bring animals (except certified companion animals) or other non-student humans to class.

Failure to practice appropriate professional conduct may result in students being asked to leave the classroom or any other learning or clinical environment. Students are immediately referred for review to the SEC should any allegation be made regarding unethical or unprofessional conduct.

**Dress Code**

As representatives of the medical profession, all MPAS students are expected to convey a professional demeanor in behavior, dress, and appearance. A professional image conveys credibility, trust, respect, and confidence to one’s colleagues and patients. In all educational settings—classroom, laboratory, and clinical environments—students are expected to be clean, well groomed, and appropriately dressed.

The dress code applies at all times when the student is on campus and to any situation in which patient-care activities occur or the occurrence of direct patient or health care professional contact can be reasonably assumed. These instances include, but are not limited to, all clinical experiences. In the absence of a stated policy for an individual course or setting, the following dress code applies:

**General Personal Care**

- Good personal hygiene should be maintained.
- Hair should be neat and clean. Hair longer than shoulder length should be secured if close contact with patients is anticipated. Beards and mustaches must be clean and well groomed.
- Perfume or cologne should be used in moderation.
- Fingernails should be clean, neatly trimmed, and short to medium length.
- Tattoos should be covered with clothing.
- Jewelry is only permitted in pierced ears. Jewelry is not permitted to be worn in pierced noses, lips, tongues, or any other exposed body part.

**Attire for the nonclinical (i.e., classroom) setting**

- Clean, business casual clothing should be worn for all students.
- Close-toed shoes should be worn.
- Shirts should be tucked in.
- Undergarments should not be visible.
Belts should be worn when necessary.

**Attire for the anatomy laboratory setting**
- Clean scrubs should be worn along with closed-toe shoes.
- Hair should be gathered so that it does not dangle onto patients or cadavers.
- Faculty may address additional requirements for student attire for the laboratory setting.

**Attire for the clinical laboratory setting**
- Female students are asked to wear shorts and a sports bra, and male students are asked to wear shorts and a tank top. In addition, students will be issued a patient gown that must be worn at each lab.

**Attire for the clinical setting**
- Short, clean, and pressed white coats with the UDPA logo and embroidered student name should be worn.
- Closed-toed shoes (with socks/stockings) should be worn.
- Men should wear collared dress shirts with appropriately knotted ties.
- Name badges should be worn.

**Inappropriate attire for classroom, laboratory, or clinical settings**
- Hats, bandanas, hoods, or head scarves (except if considered as part of religious or cultural dress) are not permitted.
- Jeans, sweatpants, sweatshirts, pajamas, scrubs (unless otherwise specified), and exercise attire are not permitted.
- Tank, mesh, halter, or tube tops are not permitted. Low-cut, spaghetti strap, and belly shirts are not permitted.
- Shorts and inappropriately short skirts are not permitted.
- Shoes must be worn. Sandals and open-toed shoes are not permitted. Sneakers are permitted on lab days only.
- Shirts with inappropriate or vulgar lettering or messages are not permitted.

**Student Code of Conduct**
The MPAS program adopts the UD Community Values and Behavioral Expectations as its Student Code of Conduct. All MPAS students are expected to abide by this code, which can be found in the UD Student Handbook [http://www.dbq.edu/media/campuslife/vpofstudentlife/2014-15-Student-Policy-Handbook.pdf](http://www.dbq.edu/media/campuslife/vpofstudentlife/2014-15-Student-Policy-Handbook.pdf)

Students are responsible for seeking clarification on any of the policies of the UD Community Values and Behavioral Expectations, or any policies herein, should they require it at any time throughout their tenure in the MPAS program.

**Academic Integrity & Academic Misconduct**
All MPAS students are required to abide by the UD Value of Integrity. Students who violate this value with respect to academic dishonesty and misconduct are referred to the SEC in accordance with the procedures outlined in this MPAS Student Handbook.

The value is as follows: The University of Dubuque expects students to be honest in academic matters. We expect each person on campus to be forthright and direct and to value integrity in
all his/her dealings. Activities and attitudes should be consistent with high academic standards, Christian commitment, and with the Mission and Values of the University.

**Definition of Academic Misconduct**

Academic Misconduct is defined as the following intentional acts or omissions committed by any MPAS student:

- **Cheating.** The unauthorized use of books, notes, aids, electronic sources; or assistance from another person with respect to examinations, course assignments, field service reports, class recitations; or the unauthorized possession of examination papers or course materials, whether originally authorized or not. Any student helping another cheat may be found guilty of academic misconduct.

- **Plagiarism.** The deliberate use and appropriation of another’s work without any indication of the source and the representation of such work as the student’s own. Any student who fails to give credit for ideas, expressions, or materials taken from another source, including internet sources, is guilty of plagiarism. Any student helping another to plagiarize may be found guilty of academic misconduct.

- **Misrepresentation.** Intentionally lying to a member of the faculty, staff, administration, or an outside agency to gain academic advantage for oneself or another, or to misrepresent or in other ways interfere with the investigation of a charge of academic misconduct.

- **Misuse of Computer Services.** The unauthorized use of any computer, computer resource or computer project number, or the alteration or destruction of computerized information or files or unauthorized appropriation of another’s program(s).

- **Bribery.** The offering of money or any item or service to a member of the faculty, staff, administration, or any other person in order to commit academic misconduct.

- **Conspiracy and Collusion.** The planning or acting with one or more fellow students, any member of the faculty, staff or administration, or any other person to commit any form of academic misconduct together.

- **Falsification of Records.** The tampering with, or altering in any way, any academic record used or maintained by the University.
**Academic Dishonesty.** Any act or omission not specifically mentioned above that is outside the customary scope of preparing and completing academic assignments and/or contrary to the above stated policies concerning academic integrity.

**Academic and Clinical Progress**
Satisfactory academic and clinical progress is expected of all MPAS students. This includes ongoing acquisition of knowledge, skills, and professional behaviors and attitudes. Student academic and clinical progress throughout the MPAS program is monitored and measured by graded assignments and performance, comprehensive student reviews, and SEC reviews as follows.

**Graded Assignments.** Student progress is monitored with detail and frequency through graded classroom and clinical assignments. Failure of examinations, courses, or clinical rotations are noted and tracked throughout the MPAS program. Should concerns arise regarding performance, instructors address these concerns as they emerge and do not wait until mid- or end-of-term reviews or grades to communicate them to students. Faculty advisors and/or the SEC may become involved in addressing concerns about student progress.

**Comprehensive Student Reviews.** At predetermined times during the course of the program, but no later than the mid-point of each semester, program faculty conduct comprehensive student reviews to assess student performance and progress. Faculty note student standings as follows:

1. **Good academic standing:** Students who meet the minimum MPAS program requirements and standards and may progress toward graduation are said to be in good academic standing.

2. **Probationary standing:** Students are on probation following this decision of the SEC after discussing remaining concerns and recent progress with program faculty. A student on probation may be denied the opportunity to participate in various extracurricular activities or events and may be denied requests for particular rotation site placement.

3. **New concern(s) identified:** Should concerns with academic or clinical progress or performance be identified in the comprehensive student review, students may be referred to faculty advisors. Any content of a meeting between the faculty member and an advisor (at which the student is not present) and any action steps proposed therein are documented and shared with the student within two business days.

Should concerns with student progress not be addressed or resolved with advising, the student and the concerns are referred to the SEC for formal review. Students may be referred to the SEC for failure to maintain a 3.0 GPA or for failure to pass a course. Should concerns with student progress or performance be identified, the SEC review process should be initiated as soon as
possible but no later than two weeks before the end of the semester in which the concerns are first identified.

**Student Evaluation Committee (SEC)**
The following describes the processes employed to evaluate MPAS student academic performance and professionalism by the SEC.

**Statement of Purpose**
The purpose of the SEC is:

- To ensure that each student who graduates from the University of Dubuque Master of Physician Assistant Studies program possesses the skills and knowledge necessary to assume the responsibilities of a physician assistant;
- To evaluate academic performance in the required curriculum, to assess advancement, and to recommend appropriate intervention in the event of unacceptable academic performance; and
- To evaluate personal qualities which bear on a student’s professionalism and fitness to become a physician assistant, and to recommend appropriate intervention. The SEC relies upon the cooperation, advice, and judgment of faculty, students, and administrators to perform these duties.

**Composition and Selection of SEC Members**
The SEC is comprised of all MPAS faculty members and a student representative from each class of the MPAS Program, all of whom are voting members. Of the faculty members, a chair will be selected. The chair will serve for three years, after which a new chair will be selected.

**Hearing Process of the SEC**

a. **Notice of Hearing.** All hearing notices are made in accordance with the notification provision set forth in this MPAS Student Handbook. Students are provided a written notice a minimum of five business days prior to the SEC meeting with the student to consider a matter within its jurisdiction. The notice will state:
   - A description of the matter under consideration
   - The time, date and place of the hearing
   - That the student has the opportunity to review the documents that the SEC is relying upon
   - A list of witnesses, if any, including students, faculty, and staff

b. **Hearing Procedure**
   i. **Information Gathering.** In the event that a matter is referred to the SEC for evaluation and recommendation, the SEC has the authority to gather information concerning the matter to assist with its deliberation and evaluation of the matter in the context of the student’s academic performance and overall professionalism. The SEC may convene meetings for any purpose including assisting with preparation for the SEC hearing.
   ii. **Meeting with Student and Confidentiality.** All student meetings are conducted in private. During the meeting with the student, the student is advised of the information that
forms the basis of the inquiry or allegation; the student then is given an opportunity to respond
to the information presented. The student may have an individual present to provide support
and advice; however, that individual may only advise the student and may not address the SEC
member(s) directly or examine or cross-examine witnesses. The SEC allows witnesses to the
incident, if any, to present pertinent information at the meeting with the student. The chair has
the authority to exclude witnesses who provide redundant or duplicative information. If
witnesses make presentations at any hearing, the student shall be entitled to pose relevant
questions to such witnesses. The SEC considers the information it has gathered and any
additional information provided by the student and makes written findings of fact and
recommendations based upon its assessment of the information presented. Such findings and
recommendations shall be provided to the program director within 10 business days of the
conclusion of the hearing.

c. **Quorum and Voting.** A quorum consists of at least one student and three faculty
members of the SEC. A recommendation is adopted when approved by a simple majority of the
members present. A recommendation to expel a student from the MPAS program must be
approved by three-fifths of the entire SEC.

d. **Record of Hearing.** Written decisions serve as the official records of a hearing.

e. **MPAS Student Evaluation Committee Recommendations.** The SEC makes one or more of
the following recommendations regarding the disposition of a matter of professional fitness
considered by the Committee:

- Find that the matter does not warrant action;
- Issue a written reprimand or warning;
- Allow the student to repeat or otherwise remediate academic deficiencies;
- Allow the student with a learning disability to continue on a modified academic schedule;
- Refer the student for counseling or psychological evaluation;
- Place the student on probation with such conditions as deemed appropriate;
- Suspend the student or place the student on leave of absence for a specified time or until
  specific conditions are met;
- Suspend the student for a period of time;
- Expel the student.

The SEC may recommend to the Program Director removal of a student’s probation once the
student has fulfilled the conditions of probation.

**Responsibilities of the Program Director**
The SEC’s recommended action steps are reviewed by the Program Director for, among other
things, logistical viability (faculty workload, support services, etc.). The Program Director either
accepts, amends, or rejects the plan. The SEC findings and recommendations with modifications,
if any, are sent to the affected student within five business days of the Program Director’s
receipt of the SEC’s written report notifying the student of the proposed findings and
recommendations.

A student may schedule an appointment with the Program Director to discuss the proposed
findings and recommendations prior to the Program Director making them final. The
appointment must be requested in writing and received by the Program Director no more than
three business days after the student receives written notification of the proposed findings and recommendations by the SEC. If a meeting is requested, it will take place promptly. Within five days of the meeting between the Program Director and the affected student or within eight days of notice to the student if no meeting is requested, the Program Director finalizes the written findings and recommendations and provides notice to the student of the same and forwards the written findings and recommendations to the Vice President for Academic Affairs for review. The Vice President for Academic Affairs reviews the findings and recommendations, and affirms or amends the findings and recommendations. Once the Vice President for Academic Affairs has affirmed or amended the Program Director’s findings and recommendations, the student is notified by the Program Director.

**Student Appeals**
A decision of the MPAS Program Director may be appealed for the following reasons: (i) There has been a violation of the student's due process rights as outlined in the hearing procedures above; (ii) The severity of the sanction is not justified by the nature of the misconduct; or (iii) New, relevant information not available during the earlier proceedings is made available, and the new information could have substantially affected the outcome of the hearing. The appeal must be in writing, specify in detail the alleged procedural impropriety, and must be filed in the Office of the Vice President for Academic Affairs within 14 calendar days of the date of receipt of the Vice President's decision. The Vice President for Academic Affairs shall review the appeal and the record of the formal hearing, and issue a decision. The decision of the Vice President of Academic Affairs is final agency action.

**Student Record Policies**
MPAS retains all student educational records in accordance with federal and state requirements and UD Board of Trustees regulations.

**Educational Records and Personally Identifiable Information**
The Family Educational Rights and Privacy Act (U.S. Public Law 93-579; FERPA) defines educational records, and governs students’ rights of privacy and access to their educational records. Any school record, either paper or electronic, that contains personally identifiable information directly related to the student is an educational record under FERPA. Such records may include:

- Directory information
- Clinical rotation schedules
- Evaluations of academic performance
- Letters of commendation and/or notifications of honors
- Information about leaves of absence
- Combined degree program enrollment information
- Records of disciplinary actions
- Documentation of change in enrollment status
- Computer media
• Microfilm
• Video and audio recordings
• Photographs
• Course and clerkship grades

Personally identifiable information contained in student education records shall be released, or open for inspection, only to the student, or parents of dependent students as defined in Section 152 of the Internal Revenue Code of 1986. “Personally identifiable” means that the data or information includes the name of a student, the student’s parent or other family members, the address of the student, a personal identifier, such as the student’s Social Security number or a student number, a list of personal characteristics or other information that would make the student’s identity easily traceable. The following are not considered educational records under FERPA:

• Private notes of individual staff or faculty that are in their sole possession
• Campus police records
• Medical records
• Statistical data compilations that contain no mention of personally identifiable information about any specific student.

MPAS program does not release or permit access to education records and personally identifiable information kept on a student except as otherwise permitted by law and this regulation. Responsibility for custody of all student educational records belongs to the University officials in charge of the area in which the records are maintained. Each designated custodian shall ensure that the procedures required by federal and Iowa law and this regulation are in place to control access to and disclosure of student education records and personally identifiable information contained therein.

Directory Information

FERPA allows for the designation of certain academic record information as “directory.” In order to prevent access to or release of directory information, a student must so notify the designated custodian of record. After such notice, access to or release of directory information is withheld until further written instruction is received from the student. “Directory Information” includes:

• Student’s name, local and permanent address, and telephone number(s)
• Date and place of birth
• Student classification and major and minor fields of study
• Participation in officially recognized activities and sports
• Weight and height of members of athletic teams
• Dates of attendance, degrees, and awards received
• The most recent previous educational agency or institution attended by the student
• Photographic image
Waiver of Right of Access

Students and parents of dependent students have the right to waive their right of access to confidential letters of recommendation and other documents that evaluate student academic performance. Such waivers shall be in writing and made a part of the official academic record. A waiver of right to access shall be effective only when the student is notified, upon request, of the names of all persons who are submitting confidential recommendations or evaluations and when the confidential letters of recommendation and other evaluative documents are used solely for the purpose intended.

The University may not condition admission, grants of financial aid, or receipt of any other service or benefit offered by the University, by another public educational institution in the State of Iowa or by any other public agency upon being provided a waiver of the right to access by the student.

Requests for Information in Connection with Research

All requests for academic research dealing with data from student education records shall be referred to the University Registrar. Such requests must be in writing and must set forth specifically the type(s) of information to which access is requested and the intended scope of the research project. The applicable custodian of records shall determine whether to grant the request, in whole or in part, and may condition access upon a guarantee that the researcher appropriately safeguards the data; that no personally identifiable information about any individual be published or made available to others; or upon other reasonable conditions.

FERPA Notice to Students

The University shall provide notification annually to students of their rights relating to education records, including the right to file complaints, the procedures to be followed in order to exercise such rights, the types of information entered in the education records maintained by the University, and the University’s policy to support the law. Notifications are published in the UD Student Handbook [http://www.dbq.edu/media/campuslife/vpofstudentlife/2014-15-Student-Policy-Handbook.pdf](http://www.dbq.edu/media/campuslife/vpofstudentlife/2014-15-Student-Policy-Handbook.pdf) The MPAS program complies with the following rights of privacy and access to student education records:

- **The right to inspect and review the student’s education records within 30 days after the day the MPAS program receives a request for access.**

A student should submit to the Admission Director or Program Director a written request that identifies the record(s) the student wishes to inspect. The request must be in writing and signed by the person seeking access or release. The custodian of the records shall require the student, or legal representative of the student when applicable, requesting access to or release of the records to present proper identification such as a valid driver’s license or passport. A copy of the request for access or release shall be retained in the student’s file. Requests are usually honored within two business days unless the custodian or designee is not available. The student may review his or her file under supervision. Supervision is by a member of the staff to ensure that the record is not altered during the review process. The MPAS policy states that the custodian
shall have up to 30 days in which to comply with a request. When the record includes information on more than one student, the custodian shall release, or permit access to only that part of the record that relates to the student who is the subject of the request. Students requesting the release to others of personally identifiable information contained in the student’s education records must provide the custodian of such records with a signed, written request specifying the information to be released, the purpose(s) for such release, and the person or organization to whom such information shall be released. A copy of all requests for access and release shall be retained by the custodian of the records and shall be available for inspection and review by the student or a parent. The University reserves the right to deny a request for copies of education records made by a student or legal representative when there is a financial obligation to the University that has not been satisfied or when there is an unresolved disciplinary action pending against the student.

- The right to request the amendment of the student’s education records that the student believes is inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

A student who wishes to ask the school to amend a record should write the school official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed. Students who challenge the accuracy of an education record shall file a written request for amendment with the custodian of the records. The student also shall present to the custodian of the records copies of all available evidence relating to the data or material being challenged. The custodian of the records shall consider the request and shall notify the student in writing within 15 school days whether the request is granted or denied. During that time, any challenge may be settled informally between the student and the custodian of the records, in consultation with other appropriate MPAS officials. If an agreement is reached, it shall be in writing and signed by all parties involved. Such agreement shall be maintained in the student’s records. If an agreement is not reached informally, or if the request for amendment is denied, the student shall be informed in writing of the denial and the right to a hearing on the matter. Additional information regarding the hearing procedures is provided to the student when notified of the right to a hearing.

- The right to provide written consent before the University discloses personally identifiable information (PII) from the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

The school discloses education records without a student’s prior written consent under the FERPA exception for disclosure to University officials with legitimate educational interests. The following persons and organizations are considered “University officials” and may have access to personally identifiable information without the student’s prior consent:

- Faculty, administrators, staff and consultants employed by the University, the University of Dubuque Board of Trustees whose work involves:
  - Performance of administrative tasks which relate to students;
  - Performance of supervisory or instructional tasks which relate to students; or
o Performance of services that benefit students.
b. Other persons who are authorized by federal and state law and regulations to have access to or receive copies of such information. Upon request, MPAS also discloses education records without consent to officials of another school in which a student seeks or intends to enroll. MPAS makes a reasonable attempt to notify each student of these disclosures.

- The right to file a complaint with the U.S. Department of Education concerning alleged failures by MPAS to comply with the requirements of FERPA.

The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202

Health Policies

Alcohol
MPAS is committed to the responsible use of alcohol by all members of the MPAS community. Irresponsible, high-risk use of alcohol threatens the lives, health, safety, and performance of our students and employees. When one drinks irresponsibly, he or she is more likely to become injured, to make unwise choices regarding sex and relationships, to miss class, to perform poorly on tests and in clinical environments, possibly endangering patients. Excessive drinking also impacts others; these second-hand consequences of drinking include interrupted sleep, inability to concentrate and study, fights, property damage, assault, rape, and death.

High-risk drinking undermines the academic mission of MPAS and jeopardizes an MPAS student’s professional aspirations. This policy is created to respond to the very serious public health problem by acting proactively in a comprehensive effort to ensure the safety and well-being of the MPAS community. To view the MPAS program’s alcohol policy, refer to the UD Student Handbook

Tobacco and Smoke-Restricted Campus

UD is a smoke restricted university. According to the National Toxicology Program, the U.S. Environmental Protection Agency, the International Agency for Research on Cancer, and the National Institute for Occupational Safety and Health, second-hand smoke contains at least 250 chemicals known to be deleterious to the health of nonsmokers who inhale it. To view MPAS program’s policy regarding smoking, refer to the UD Student Handbook

Drug-Free School and Workplace Policy
As a condition of receiving funds or any other financial assistance under any federal program, institutions of higher education shall certify that they have developed and implemented an Alcohol and Drug-Free Workplace and Campus Policy. To see the policy online, go to www.dbq.edu/media/campuslife/vpofstudentlife/2014-15-Student-Policy-Handbook.pdf

Communicable Diseases Policy
All students with communicable diseases or conditions are not permitted to engage in patient contact until such conditions have been resolved as documented by a physician. This restriction is necessary to protect the health and safety of UD MPAS patients and staff. Persons with the following medical conditions are not allowed patient contact without prior medical clearance:

- Active chickenpox, measles, German measles, herpes zoster (shingles), acute hepatitis, and tuberculosis
- Oral herpes with draining lesions
- Group A streptococcal disease (i.e., strep throat) until 24 hours after treatment has been received
- Draining or infected skin lesions (e.g., Methicillin Resistant Staphyloccocus Aureus or MRSA)
- AIDS

A student who has a communicable disease or is unsure whether he or she should participate in patient care should seek medical care by a private physician. All students with a communicable disease must receive written medical clearance from a licensed provider and must submit to the Program Director prior to return to clinical care activities. A case-by-case evaluation of each infected student shall be done by his or her physician to determine his or her ability to perform the duties required of the clinical rotation. Based on the recommendations of his or her physician, it is the responsibility of each infected MPAS student to notify the MPAS program office if unable to perform clinical work; appropriate documentation is required. All such notifications are kept strictly confidential.

HIV/AIDS
The university strives to provide the MPAS community programs and services that focus on support, education, and prevention of HIV/AIDS.

Students and employees of MPAS who may become infected with the HIV virus are not excluded from enrollment or employment, or restricted in their access to university services or facilities, unless individual medical evaluation establishes that such exclusion or restrictions are necessary for the welfare of the individual and/or other members of the University community.

Members of the MPAS community who may be at risk for HIV infection are encouraged to get tested. The MPAS program encourages participation in wellness courses that cover prevention and transmission of sexually transmitted diseases such as HIV.
Biosafety, Blood-borne Pathogen, and Needle Stick Injury Policies

The MPAS program is diligent in educating students about precautionary infection control measures for airborne and blood-borne pathogens prior to students’ first contact with patients and first contact with human tissue, blood products, and body fluids. Ultimately, each student is responsible for his or her health and safety in the clinical/educational setting; therefore, it is the goal of the MPAS program that all students learn appropriate policies and procedures to follow in the event that they are injured or potentially exposed to blood-borne pathogens or other communicable diseases.

All MPAS students receive and review the OSHA guidelines on blood-borne pathogens https://www.osha.gov/pls/oshaweb/owadisp.show_document?p_table=standards&p_id=10051 during orientation week. Additionally, MPAS students receive an orientation to the blood-borne pathogen policy of the affiliate hospital prior to commencing laboratory and/or patient care activities. MPAS clerkships are conducted at various clinical sites throughout Iowa and the Tri-State area. MPAS students receive site-specific policies prior to their work at each site and should follow the established protocols at that site for immediate care and treatment after exposure.

The MPAS policies and procedures pertaining to exposure to biohazardous materials (e.g., a needle stick injury) in both laboratory and clinical care settings are available in the Student Clinical Rotation Guide available online at http://www.dbq.edu/Academics/OfficeofAcademicAffairs/GraduatePrograms/MasterinPhysicianAssistantStudies/StudentResourcesandUsefulLinks/

The MPAS program follows the exposure and environmental hazards delineated in the Student Clinical Rotation Guide. The students will also follow the same guidelines while on campus and rotation sites.

Guidelines are available online at https://www.osha.gov/ to protect students from the risk of occupational infection with HIV, hepatitis B, or other blood-borne pathogens, and to implement the United States Department of Labor Occupational Safety and Health Administration (OSHA) Standard 29 CFR Section 1910.1030 Blood-borne Pathogens.

The MPAS program has addressed methods of prevention, procedures for care and treatment after exposure (including definition of financial responsibility), and effect on student learning activities as follows:
1. All exposure incidents are regarded as serious and must be reported and documented immediately to the faculty member on call.
2. First aid shall be immediately administered for all types of injuries, including cuts and burns; exposed areas must be thoroughly washed with soap and water.
3. The faculty supervising the student shall be informed immediately. If no faculty member is immediately present, the student will contact the faculty member on call.
4. The supervisor must attempt to obtain witness reports of the incident.
5. The supervisor shall attempt to determine the nature of the exposure(s) and any associated biohazardous risks, including documentation of routes of exposure(s).

6. If possible, source material of the exposure should be retained and secured in a safe manner.

7. If the supervisor determines that the incident constitutes an occupational exposure to biohazardous materials, then he or she immediately will begin documentation of the incident using the Student Exposure Report Form found in Appendix B herein.

8. All information related to student exposure shall be regarded as confidential.

9. Documentation of the incident shall include the activity in which the student was engaged at the time of exposure, the extent to which appropriate work practices and protective equipment were used, and a description of the source of exposure.

10. On-campus injuries: The student is directed to UD Office of Medical Services (OMS) during normal business hours for appropriate follow up. If the incident occurs after working hours, or requires emergency care, then the student will be directed to the nearest emergency department for proper evaluation.

11. Off-campus injuries: The student is directed to seek care at the hospital’s emergency department (according to the clinical affiliation agreement), or referred to the closest outpatient clinic.

12. The student assumes responsibility for all charges associated with diagnosis and treatment of exposure injuries not covered by his or her health insurance plan. A student may request the University’s assistance by discussing the situation with a representative from the Program Director’s office.

13. Students should follow up with the OMS or with their primary care physician.

Students who become exposed to biohazardous materials must follow the UD MPAS program’s established procedures to receive timely diagnostic and therapeutic care. Students who experience needle stick and other types of injuries at any location (i.e., on campus, hospitals, ambulatory clinics, or neighborhood households) must immediately notify their supervisor and should receive immediate first aid and initial care at the site where the injury occurred.

Continued monitoring and enforcement of the MPAS Blood-borne Pathogen Exposure policy is critical for maintaining the safety of MPAS students, faculty, staff, and patients in all learning environments. Immediately after all known exposures, MPAS students must first contact their instructor or attending physician and report the name of the source patient and diagnosis. This information is necessary to assist in determining the potential severity of the exposure. In addition, all exposures also must be reported to the MPAS program office. Policies and procedures, including specific reporting forms and surveillance information is located in the UD Student Clinical Rotation Guide available online at http://www.dbq.edu/Academics/OfficeofAcademicAffairs/GraduatePrograms/MasterinPhysicianAssistantStudies/StudentResourcesandUsefulLinks/

All injured students must complete required incident report forms if the injury occurred at a clinical sites, and all injured students must complete and submit the UD MPAS Student Exposure to Blood-borne Pathogens Form within 24 hours of the injury. This form is located in the Student Clinical Rotation Guide.
Students who become exposed to bio hazardous materials while at a UD MPAS-affiliated clinical site (or other institution) must follow established protocols at that site for immediate care and treatment after exposure. All affiliation agreements with clinical sites contain provisions for the care of students who sustain needle stick injuries. UD MPAS students may receive follow up care and treatment for injury or exposure at the clinical site where the injury occurred, or at their private physician’s office. Students are responsible for the payment of fees associated with the diagnostic and therapeutic services associated with needle stick and other types of injuries, including filing health insurance claims. The student assumes responsibility for all charges that are not covered by his or her health insurance plan. A student may request the assistance of the UD MPAS program by discussing the situation with the Program Director.

Students infected with blood-borne or other pathogens shall not, solely because of such infection, be excluded from participation in any phase of university life, including educational opportunities, employment, and extracurricular activities, except as otherwise required by applicable federal, state, or local law, or unless their health condition presents a direct threat to the health and safety of themselves or others. Students infected with airborne pathogens are excluded from participation in such activities during the infectious stage of their disease.

Students who know, or who have reasonable basis for believing, that they are infected with blood-borne or airborne pathogens are expected to seek medical care. Students are excused from clinical activities in order to seek medical care for blood-borne or airborne pathogen exposure.

If a student’s exposure results in the contraction of a disease or disability, the student is allowed to continue in the education program with as little disruption as safely possible depending on the circumstances. The student’s specific medical circumstances are evaluated confidentially on a case-by-case basis. In some cases, students may be unable to participate fully in university life or meet MPAS technical standards because of their illness.

**Technology Policies**

MPAS students are expected to abide by the UD policies on the use of information technology, found online at:

- **Computer Misuse**
  
  **Definition:** all policies outlined in the Technology Acceptable Use policy which includes, but is not limited to, criminal speech and/or use in the course of committing a crime, inappropriate, obscene, profane, lewd, vulgar, pornographic, disrespectful, threatening, or inflammatory language, video, or graphics. It also includes harassment, personal attacks (including prejudicial or discriminatory attacks), false or defamatory material about a person or organization, dangerous information (information that, if acted upon, could cause damage, present a danger, or educational or business operation disruption),
violations of privacy, abuse of resources (use of chain letters or “spamming”), and copyright infringement or plagiarism.

**E-mail Policy**

The MPAS program uses UD email as the primary means of communication with students. MPAS students should check their UD email accounts frequently for important information and notifications from the MPAS program. The MPAS program cannot be held responsible for missed notifications resulting from unread email.

**Technology HelpDesk**

The University offers a Technology HelpDesk on the first floor of Van Vliet Hall. It is staffed Monday through Friday from 8:00 a.m. – 5:00 p.m. To report computer problems, call 563.589.3737 or email helpdesk@dbq.edu Additional information regarding this service is available in the UD Student Handbook [http://www.dbq.edu/media/campuslife/ypostudentlife/2014-15-Student-Policy-Handbook.pdf](http://www.dbq.edu/media/campuslife/ypostudentlife/2014-15-Student-Policy-Handbook.pdf)

**Media Services**

Media Services loans equipment to students for classes and University-related events. Available items include camcorders and tripods, PowerPoint remotes, Mixers, amplifiers, speakers and microphones. For more information, you can call Media Services at 563.589.3350 or go to [http://www.dbq.edu/CampusLife/FacilitiesandServices/OfficeofTechnology/MultimediaServices/](http://www.dbq.edu/CampusLife/FacilitiesandServices/OfficeofTechnology/MultimediaServices/)

**Social Media Policy**

Social media refers to a variety of internet-based programs that allow users the ability to create and publish online content (text and photos) about themselves or others. Subject to applicable UD policies, and state and federal laws regarding the use of such technologies for transmitting protected information, the MPAS program welcomes the responsible use of social media technologies to support and engage learning and for effective outreach to the global community.

**General Policy Statements**

The term “social media” includes the following:
- Communication via email, text messaging, or transfer of photographs of file documents using computers, smart phones, portable communication devices, and other technologies;
- The use of web-based applications such as, but not limited to, Facebook, Twitter, Tumblr, Instagram, MySpace, LinkedIn, YouTube, Flickr, blogs, wikis, and other outlets where comments are posted in network-based public settings; and
Future technologies that permit Internet-based information sharing.

This policy applies to all types of social media participation at any time by UD MPAS students.

Students must abide by the laws, rules, regulations, and policies governing the protection of sensitive information such as the Health Insurance Portability and Accountability Act of 1996 (HIPAA) governing the dissemination of health information and the Family Education Rights and Privacy Act (FERPA) governing the dissemination of education records. Failure to do so can result in serious consequences both academically and legally. Confidential information must be protected at all times and must never be shared on any social media site, including, but not limited, to the following:

- Health information about anyone other than the student posting the information.
- Personal information about MPAS students, employees, or alumni (e.g., private e-mail addresses, grades, health information, demographic information, information about interactions with patients, and photographs of patients or the care environment—some of which may be FERPA protected).
- Defamation of MPAS and its affiliates, faculty, staff, and other students.

If UD and/or MPAS become aware of postings on any social media venue that have a negative or detrimental impact on the University or MPAS program, such information can be used in determining the appropriate sanction for failure to act in accordance with this policy, which may include dismissal.

Be proactive about your professionalism:
- Separate personal from professional. Identify your opinions as your own.
- Be professional and respectful.
- Always think before you post, remembering that anything you share via social media is not private and can be shared, stored, and spread globally.
- Never post anything when you are angry, stressed, or lack sufficient time to review carefully.
- You should only post information, photos, and comments online if you would feel comfortable seeing them on TV or on the front page of the newspaper.
- Postings are permanent and can be retrieved even after being deleted by the user.
- Be timely and accurate. Check facts, grammar, and spelling of all content before posting.
- Use highest privacy settings available. Social media sites are often targeted by cyber-criminals who use personal data for identity theft.

Prohibited activities: these may represent violations of the law and/or University policy and may result in academic discipline and/or legal sanctions:
- Communicating with patients using social media, including “friending” a patient.
- Posting patient information, including protected health information or photos, on any social networking sites, blogs, instant messaging or text messaging services.
• Taking photos of patients and procedures. Photos of patients may only be taken when instructed by clinical faculty and proper protocols are followed and permissions obtained.
• Using cell phones, fax machines, or email to transmit confidential information.
• Posting personal information (e.g., home address, phone, password clues, social security number) or photos that show or appear to show you engaging in any offensive behavior, including, without limitation, promiscuity, intoxication, or substance abuse.
• Posting potentially inflammatory or unflattering material on another’s website or wall.
• Posting educational records or other student information protected by FERPA.
• Posting profane or disparaging information about students, faculty, courses, rotations, hospitals, UD, or the MPAS program.
• Presenting yourself as an official representative or spokesperson for UD or the MPAS program on social media.
• Using UD and/or UDPA logos or personal identification numbers in any social media postings.
• Creating personal social media sites using UD email addresses or computer equipment.
• Using smart phones, portable communication and/or other social media devices for personal or non-emergent reasons during encounters involving patients or patients’ families and friends, to include but not limited to, the following areas:
  o Hospital patient rooms, exam and treatment areas, operating room, emergency room
  o Outpatient clinics
  o Physician or patient lounges, nurse’s stations, hallways, waiting rooms, elevators, etc.
  o During patient care rounds or didactic presentations that discuss specific patients

Violations of Policy
Students who violate this policy are disciplined and verbally instructed by the Program Director to implement immediate corrective action. Depending on the type and severity of the infraction, immediate disciplinary and/or legal action may be warranted. This policy does not replace other UD or MPAS program policies governing disclosure of confidential information, including protected health information and education records.

Library
The Charles C. Myers Library has 5.0 FTE professional librarians and 5.25 FTE support staff. The library is located at the heart of campus and is open 108.5 hours per week. The building provides a variety of individual and small-group workspaces, including some located in designated quiet areas. There are many individual research carrels and small group tables in addition to seven individual study rooms and five small group study rooms which accommodate up to six students each. There are more than 60 computers available for student use as well as laptops for check-out. Wireless printing and a cell phone/tablet charging station ensure that the library is a convenient place for study as well as relaxation. The library has a designated liaison for the
MPAS program who actively helps students and faculty to effectively access information for teaching and learning. The liaison will assist faculty with program development and evaluation by providing literature reviews on relevant topics as requested. The liaison will assist students through large group information literacy instruction in the MPAS program orientation as well as in selected courses with required research assignments. Library staff are partnering with MPAS faculty to identify and purchase a collection of library resources for the program, emphasizing electronic resources available from any location.

Hours are available on the website at [http://www.dbq.edu/library/Index.cfm](http://www.dbq.edu/library/Index.cfm)

**Resources**

The library subscribes to approximately 8500 journals in the areas of medicine, the biological sciences, nursing, and allied health, and have identified additional subscriptions necessary for the MPAS program. Online health sciences databases already available for all UD students include Cumulative Index to Nursing and Allied Health Literature (CINAHL), Ovid Essential Nursing Collection, Health Source: Nursing/ Academic, and Medline. Additional PA-specific electronic resources are under consideration. Librarians will support commonly-used medical/diagnostic apps, including collaborating with vendors to link to UD database/journal subscriptions whenever possible. As of February 2015, the library owns approximately 2560 health/medical books in print and 35,900 titles electronically. The collection will emphasize electronic versions and will be updated continuously with faculty input. A large DVD collection is available for faculty and student use, and the library subscribes to a streaming film database (Films on Demand) which includes 2800 health/medical titles as well as 1600 in biology, including 830 in human anatomy.

Circulating books are available for renewable check-out periods of four weeks for students and the entire semester for faculty; DVDs and print periodicals are available for two weeks. Reserve materials are available for in-library use, with other borrowing options as determined by faculty. The library staff provides a free interlibrary loan service, which provides access to books, films, and articles that UD does not own. Some interlibrary loans are provided via Docline, a partnership of health sciences libraries through the National Library of Medicine, of which UD is a member.

**Computer and Internet Access & Library Help Desk**

There are 26 public workstations within the library that are fully networked and provide Microsoft Windows 7 and Office 2013 Professional for student use. The entire campus is wireless.
Printing and Scanning
The Multimedia Center of the library has a flatbed scanner and a color laser printer available for students. There is another color laser printer available on the second floor.

Reference/Research Assistance and Tutorials
Dedicated and experienced librarians are available weekdays to assist students who have reference questions or need help with research. Librarians also provide hands-on database instructions to individuals and small groups.

Interlibrary Loan Service
UD students and staff may check out books and most multimedia for four weeks. Material may be renewed twice if it is not needed by another person or for reserve. Faculty may check out material for the semester. All faculty material must physically be returned to the library at the end of spring semester.

Periodicals, DVDs and videocassettes circulate for 14 days. Reference books do not circulate.

Behavior
Professional and respectful behavior and compliance with policies is expected at all times in the library. Violators are asked to leave. MPAS students who abuse library policies are reported to the MPAS program office.

UD Emergency Policies
Emergency and non-emergency calls from residence halls for fire, police, or ambulance assistance or services should be directed through the UD Safety and Security Department at x3333 or 563.589.3333. If a situation requires immediate action, the local emergency service number should be contacted (911); then if able, call the Safety and Security Department.

Depending on the type of emergency, contact one of the following:
- Police 911
- UD Safety and Security Department at x3333 or 563.589.3333
- A Resident Assistant (on duty each evening in residence halls) and/or the Hall Director/Area Coordinator on duty
- Assistant Dean and Director of Residence Life, or Vice President and Dean of Student Life

If you feel unsafe or are faced with an emergency, use the emergency telephones located around campus. The telephones have a blue light on top and are labeled “Emergency.” To operate emergency telephones, press the red button and the Safety and Security staff will immediately know your location and assist. They are located in the following areas:
• University Park Drive near the traffic gate (by Donnell Hall)
• University Park Drive (between Donnell Hall and Park Village)
• University Park Drive near the traffic gate (by Park Village).
• Hardee’s parking lot
• CRWC located at the outside entrance
• Mercer Birmingham Hall
• Heritage Center- north, south, and west entrances
• All residence halls have a phone in the main exterior entrance. However, they do not have a blue light
• The following academic buildings have exterior phones but do not have a blue light: CRWC, maintenance building, MTAC, Myers Library and the University Science Center
• Smith Hall (does not have an exterior phone.) However, the lower entrance is always unlocked and the Safety and Security staff is always available in their office or by using the red security phone located outside the office

When faced with any type of emergency or inclement weather, the health and safety of students are paramount concerns of the MPAS Program. As emergencies occur unexpectedly, the MPAS program in conjunction with the UD Safety and Security Department ensures that all MPAS students receive immediate notification of all emergency alerts provided to MPAS students.

By definition, an emergency at UD can include all of the following:
• Fatal or critical accidents, injuries, or illnesses occurring on university premises, involving employees, students, or visitors
• University-related transportation accidents involving hazardous materials or major property damage
• Reports of acute illnesses involving persons arising from chemical or biological emissions or exposures on University premises
• Reports of acute illnesses or injuries arising from the consumption or use of any product purchased, sold, or distributed by the University or on University premises
• Major spills or emission of hazardous materials inside buildings on University premises to the extent that the well-being of the University community, the local community, and/or the environment may be affected
• Natural disasters, including storms, floods, hurricanes, or tornadoes
• Fires, explosions, bomb threats and terrorist threats on and off campus
• Violence or rioting on or in close proximity to University premises
• Extended and/or widespread utility interruptions with particular emphasis on how they affect class schedules, research projects, University residential facilities, or the ability of the University to continue normal operations
• Unauthorized major work stoppages, boycotts, or threatened boycotts of University-sponsored events.
MPAS Classes and Clinical Rotations in Case of an Emergency

All classes in the basic and clinical sciences follow the University’s temporary closure policy in the event of an emergency. Students assigned to off-campus clinical rotations during a local or geographically widespread emergency should contact the Program Director for specific instructions pertaining to students’ instructional responsibilities. As a general rule, clinical care responsibilities are expected to be fulfilled, and students should follow the policies of the affiliate clinical site where they are currently assigned. Students on clinical rotations are generally expected to report to their clinical assignments unless severe weather conditions prohibit safe travel; each student should make a prudent judgment as to the possibility of safe travel. The Program Director will contact all clinical sites and advise preceptors of student attendance in the case of an emergency.

During an emergency, students should tune in to local television and radio broadcasts to remain informed regarding MPAS. This is especially true during natural disasters. In addition, students can contact UD. As soon as possible after an emergency, students should establish contact with professors and/or preceptors.

General Safety Guidelines

Students must be aware of the need for personal safety and act accordingly to minimize risks. The safety and security of students are the first priority of the MPAS program. Safety and security practices are reviewed prior to community and clinical experiences. Examples of such educational training programs include:

- Universal precautions
- Needle stick prevention
- Response to needle stick or bodily fluid exposure
- De-escalation techniques when dealing with angry patient
- Emergency procedures involving medical care (e.g., CPR), natural disasters, terrorism, assault, illegal activities and others

While working in community settings, including hospitals, clinics, home visits, and other off-campus venues, MPAS students should take precautions and use common sense including but not limited to the following:

- Be aware of your surroundings
- Do not stand out (e.g., wearing flashy or expensive jewelry)
- Do not carry excessive amounts of money
- Do not leave valuables in plain sight
- Travel in pairs whenever possible
- Keep car doors locked and windows closed

While working or studying on campus, it is important to note that the UD Safety and Security Department has jurisdiction over the entire University. Emergency phones have been installed at strategic locations around the UD campus, which connect directly to the UD Safety and Security Department. Students are urged to take notice of and become familiar with their locations. As
members of the UD community, students can enhance their personal safety and help keep the campus safe by taking precautions, including but not limited to, the following:

- Use prudent precautions for personal safety including walking in pairs in isolated places or during the evening. Students should not hesitate to call the Safety and Security Department at night.
- Keep close watch on your personal property. Do not leave personal property such as books, audio or video players, cell phones, PDAs, laptops, purses, wallets, jewelry, cameras, or other valuable objects unattended or out of your sight or in classrooms, the library, restrooms, campus dining areas, the bookstore, your vehicle, or in any public place.
- Report all on-campus thefts or suspicious persons or activities to the UD Safety and Security Department.

While fulfilling MPAS educational objectives, students also must be aware of the need for personal safety and act accordingly to minimize risks. The key message for students is to be cautious and use common sense. Always listen to your “gut” and follow your instincts. If an environment or situation feels unsafe, stay calm and leave immediately. Discuss with a faculty supervisor and/or call law enforcement.

Emergency contact information:

- For all off-campus emergencies, call 911
- For all on-campus emergencies and urgent scenarios involving safety, call the UD Safety and Security Department using emergency phones located throughout the campus or by dialing 563.589.3333
- For non-urgent safety concerns or questions, contact the MPAS office

**Technical Standards**

The technical standards set forth by the MPAS program establish the essential qualities considered necessary for students to be admitted to and successfully complete the program. These standards ensure graduates possess the intellectual ability to learn, integrate, analyze, and synthesize data. MPAS students must meet all technical standards upon matriculation and throughout enrollment in the MPAS program. In the event a student is unable to fulfill these technical standards, with reasonable accommodation, the student is subject to dismissal. MPAS students must be fully able to perform the essential functions in each of the following categories:

(1) **Observation.** Acquire, assimilate, interpret, integrate, and apply information from direct observation, oral and written communication of radiographic and other imaging techniques, pathologic and laboratory testing, electrocardiograms, and other reports or studies.

(2) **Communication.** Communicate effectively and sensitively with patients, health professionals, teachers, staff, and peers, both orally and in writing and when the time available for communication is limited. Accurately obtain a medical history from the patient or his or her health care proxy.
(3) Motor. Perform procedures fundamental to medicine, including participating fully in curriculum requirements in the classroom, laboratory, and clinical settings. Perform diagnostic and emergency maneuvers and procedures, such as palpation, percussion, auscultation, airway management, cardiopulmonary resuscitation, suturing, and assisting in surgery.

(4) Intellectual. Perform problem-solving tasks quickly and efficiently in an environment that may change rapidly, without warning, and/or in unpredictable ways. Comprehend three-dimensional and spatial relationships.

(5) Behavioral/social. Possess the emotional stability to exercise sound judgment; manage physical and emotional stress; exhibit sufficient interpersonal skills to interact with people at all levels in a culturally diverse society; and form compassionate relationships with patients while maintaining appropriate professional boundaries. Meeting the technical standards is required but does not guarantee a student's eligibility for the Physician Assistant National Certifying Exam (PANCE). Students also must meet the expectations of the program’s accrediting agency (Accreditation Review Commission on Education for the Physician Assistant, Inc. [ARC-PA]).

Students with Disabilities
The MPAS program abides by UD policies and procedures regarding students with disabilities. MPAS students with disabilities who wish to receive accommodations based on a disability must register with the UD Academic Success Center/Disability Services [http://www.dbq.edu/academics/academicsupportsuccess/] An individual with a disability is one who—with or without reasonable modifications to the rules, policies, or practices; the removal of architectural, communication, or transportation barriers; or the provision of auxiliary aids and services—meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by the University. Disabilities may be categorized as physical, psychological, and/or learning incapacities. The staff collaborates with students, faculty, staff, and community members to create diverse learning environments that are usable, equitable, inclusive, and sustainable. The Academic Success Center/Disability Services provides MPAS students with disabilities the support necessary to successfully complete their education and participate in activities available to all students.

Due Process Policies

Grievances
Students wishing to file a grievance should do so through the following offices:

- Academic Issues: Vice President for Academic Affairs, Van Vliet Hall
- Co-curricular Issues: Vice President/Dean of Student Life, Peters Commons

If a student is unsure of who to contact or how to proceed, the student should consult the Vice President/Dean of Student Life.
Purpose of the Grievance Policy and Procedure
The purpose of this policy and procedure is to provide a means for MPAS students to seek investigation and possible resolution of grievances. MPAS students are encouraged to informally resolve a grievance as soon as possible through a meeting with the instructor. If the matter cannot be resolved, or if the professor cannot be reached, the student should meet with the Program Director. If the student’s grievance is against a committee, the students must meet with the committee chairperson and the Program Director to attempt informal resolution. A mutually agreeable resolution shall be formalized through a notation in the student’s file/record that is initialed by the student and the professor.

Formal Grievance Procedure
The formal grievance procedure is outlined in the UD Student Handbook

MPAS Non-discrimination Policy and Discrimination Complaint Procedures
The University of Dubuque does not discriminate on the basis of race, color, national origin, sex, handicap, disability, sexual orientation or age. Any violations of such should be reported to the Director of Human Resources.

In addition, the University of Dubuque strives to foster respect for the dignity and worth of all members of the University community by providing an educational and professional environment free of unwanted sexual advances, requests for sexual favors, and other verbal or physical conduct that is oppressive or intimidating. The University has a zero tolerance policy regarding sexual harassment. The UD Sexual Harassment Policy can be found in the Student Handbook http://www.dbq.edu/media/campuslife/vpofstudentlife/2014-15-Student-Policy-Handbook.pdf

Section V: Student Activities and MPAS Services

Class President
Each MPAS class shall elect a class president by the 10th week of their first semester. The class president has three primary duties:

1. To serve as a student representative (after signing a confidentiality statement) on the Student Evaluation Committee (SEC). This committee is charged with evaluating the progress of all students and determining plans to remediate, decelerate, or dismiss students from the MPAS program. The class president will recuse himself or herself during his or her own evaluation.

2. To serve as organizer of any class activities the class agrees to sponsor, eventually including reunions of alumni.
3. To serve whenever a class representative is needed by UD for broader University functions.

**Professional Organizations**

MPAS students will become student members of the following professional organizations:

- **American Academy of Physician Assistants (AAPA).** The Student Academy of the American Academy of Physician Assistants (SAAAPA) is the student chapter of AAPA. Membership in this SAAAPA can keep students abreast of important and current issues affecting PA education and practice.
- **Iowa Physician Assistants Society (IPAS),** a state chapter of AAPA.

**Student Services**

The following services are offered to all MPAS students and the MPAS program encourages students to utilize these services.

**Counseling Services**

Personal Counseling. The University provides personal counseling services for students who have emotional, social, academic, vocational, sexual, or personal concerns, utilizing both psychologists and master’s degree-level mental health practitioners. Short term personal counseling is confidential and is provided at no cost to students. In addition, there are two campus chaplains available to provide spiritual counseling as needed.

Academic and Career Center. The Academic and Career Advising Center provides a full range of programs and services, including career assessment and counseling, job shadow and internship opportunities, and cover letter and resume consultations. In addition, well established "mock interview" and "dress for success" programs are available.

**Student Health Service**

UD Health Service is available to all MPAS students who are currently enrolled in classes and consists of a UD Medical Coordinator who will schedule appointments at area medical facilities for students needing medical attention. The service can include being seen at UnityPoint Health-Finley Convenient Care after hours and on weekends. Visits to UnityPoint Health-Finley, which include an assessment by a nurse practitioner or physician, are provided free of charge by UD. Tests, such as labs, x-rays, and visits to the emergency room are the responsibility of the student. All charges will be filed with the student’s insurance plan. It is imperative that students always have their insurance card and student ID with them for medical appointments and emergency room visits.

Transportation to medical facilities: Students are encouraged to organize rides with friends if they cannot transport themselves. Taxi services are available in Dubuque if students cannot find
other modes of transportation. The University does not provide transportation to or from medical facilities.

Making a medical appointment utilizing UD Health Service:

- To schedule a medical appointment for an illness or injury, call the UD Medical Coordinator at 563.589.3244.
- The Medical Coordinator will complete a Student Medical Referral which you will take to your appointment.
- The Medical Referral form will indicate when the student may return to class or if the student is being referred to another physician for follow-up. The student must return the completed referral form to the UD Medical Coordinator directly after the appointment (if after hours, then the next day).
- If you are unable to reach the Medical Coordinator after hours, report to UnityPoint Health-Finley Convenient Care. If it is an emergency, contact UD Safety and Security Department at 563.589.3333 or call 911. UnityPoint Health-Finley Convenient Care will determine if you should be seen in the Emergency Room. Charges for Emergency Room services will be billed to you or your insurance plan. UD does not cover services provided in the Emergency Room.

Appendix A—Absence Excusal Form
Master of Science in Physician Assistant Studies

In the event of an anticipated absence requiring the student to miss one or more days of class or a clinical rotation, the student must complete this Absence Excusal Form and submit it to the Program Director at least **seven** days in advance of the anticipated absence.

In addition, students absent from a clinical rotation as a result of an **emergency** must complete and submit this form to the Program Director within 24 hours of their absence. Failure to do so may result in referral to SEC.

Appendix B – Student Exposure Incident Form
Master of Science in Physician Assistant Studies

Dear Healthcare Professional:

One of our MPAS students may have been exposed to blood-borne pathogens during their clinical clerkship. This individual had direct contact with potentially infected blood or other potentially infectious materials.

In accordance with the requirements of OSHA’s Blood-borne Pathogen Standard, the exposed student must immediately have made available to them a confidential medical evaluation and follow-up which must include at least the following elements:

a. Documentation of the route(s) of exposure, and the circumstances under which the exposure incident occurred;

b. Identification and documentation of the source individual, unless the clinical education site can establish that identification is infeasible or prohibited by state or local law;
   1) The source individual's blood shall be tested as soon as feasible and after consent is obtained in order to determine HBV and HIV infectivity. If consent is not obtained, the clinical education site shall establish that legally required consent cannot be obtained. When law does not require the source individual’s consent, the source individual's blood, if available, shall be tested and the results documented.
   2) When the source individual is already known to be infected with HBV or HIV, testing for the source individual's HBV or HIV status need not be repeated.
   3) Results of the source individual's testing shall be made available to the exposed student, and the student shall be informed of applicable laws and regulations concerning disclosure of the identity and infectious status of the source individual.

c. Collection and testing of blood for HBV and HIV serological status;
   1) The exposed student's blood shall be collected as soon as feasible and tested after consent is obtained.
   2) If the student consents to baseline blood collection, but does not give consent at that time for HIV serologic testing, the sample shall be preserved for at least 90 days. If, within 90 days of the exposure incident, the student elects to have the baseline sample tested, such testing shall be done as soon as feasible.

d. Post-exposure prophylaxis, when medically indicated, as recommended by the U.S. Public Health Service

e. Counseling

f. Evaluation of reported illnesses
Student Exposure Incident Form Continued

In accordance with the requirements of OSHA's Blood-borne Pathogen Standard, you are being provided with the following information:

a. A copy of the Blood-borne Pathogen Standard 
Please pay special attention to sections 1910.1030 (f)(3 to 5) of the Blood-borne Pathogen Standard if you are not familiar with this regulation; the indicated sections deal specifically with post-exposure evaluation and follow-up, information provided to the healthcare professional, and the healthcare professional's written opinion.);
b. A description of the exposed student's duties as they relate to the exposure incident);
c. Documentation of the route(s) of exposure and circumstances under which exposure occurred
d. Results of the source individual's blood testing, if available; and
e. Copies of all medical records relevant to the appropriate treatment of the student, including hepatitis B virus vaccination status, which are the University's responsibility to maintain.

Please review the provided information and complete the post-exposure evaluation form. Return the original copy of the completed form to the MPAS Program Director and give a copy to the patient within 15 days of the completion of the evaluation.

The healthcare professional's written opinion for post-exposure evaluation and follow-up (copies attached) must be limited to the following information:

a. That the student has been informed of the results of the evaluation; and
b. That the student has been told about any medical conditions resulting from exposure to blood or other potentially infectious materials which require further evaluation or treatment.

All other findings or diagnoses must remain confidential and shall NOT be included in the written report. If medical follow-up is indicated, please complete the medical follow-up form for each follow-up visit and return it to the address indicated.
