

ELLA ENGLEHAUPT (C'28)

My name is Ella, and I'm from Ladd, Illinois. I am a freshman double majoring in computer information systems and cybersecurity. I have found so many amazing ways to stay involved at UD including being on the tennis team, TRIO, and the Honors program. I was recently cast in the spring musical and I work in the Advancement office. All of these experiences have helped me truly feel connected to the UD community.

The support that UD provides through scholarships and programs has made a huge difference in my life. The scholarships that I have received allow me to pursue my education alongside my two brothers, who are also students here. Being at UD with them has been something I will cherish forever! The resources and experiences available at UD have helped me grow academically and personally. After graduation, I plan to utilize the skills and experiences that I have gained to pursue a career in cybersecurity or programming. I am truly grateful to be a part of such a great community that values and invests in its students!
