

About Me:

I am from La Crescenta, CA. I transferred here from Eastern New Mexico University last year. I completed my undergrad with a degree in business administration and human resource management. I am now working towards my masters in management: sport marketing and management. I am on the baseball team and a student ambassador.

Where do you see yourself after graduation?

I am still undecided what I want to do after I graduate from UD, but I would love to own my own sports facility. Along with this, I would love to coach someday.

What makes UD special?

UD feels like home, and that is because of the amazing people here. Specifically, my baseball coaches have taught me so much and helped me grow not only as an athlete, but also as a person!

“You have allowed me to get a great education while playing the sport that I love. Thank you for making this place so special. It has become my home away from home!”
