

“Thank you! Because of your investments and donations, we are able to learn at a high level and that is going to benefit us in the future, especially as we enter the workforce and contribute to society within our professions.”

What is your major?

I am a sophomore nursing student at UD.

What are you involved in?

I am on the soccer team and UDSNA, which is the Student Nursing Association.

How has the support UD receives impacted your education?

The science building, in particular, has impacted my life. We are able to use cadavers which has been beneficial in learning anatomy. The simulation labs help with real-world scenarios before going into the hospital and interacting with patients.

What makes UD special?

It is a welcoming campus and the dining service staff, security, coaches, and professors are nice and helpful. UD is a place where you feel a sense of home and togetherness when you are on campus, and even out in the community.
